

Journal of
Long-Term Effects of Medical Implants

Volume 19 Subject Index

Page Ranges

Issue 1: 1–97; Issue 2: 99–170;
Issue 3: 171–248; Issue 4: 249–340

3-D modeling, 13
510(k) premarket notification, 173
ACL, 185
adjudication, 209
animal models, 19
ankylosis, 139
anterior cruciate ligament, 185
arthroplasty, 139, 149
artificial high flexion knee, 265
bias, 223
biocompatibility, 113
bioethics, 103
biomaterials, 19
biomedical engineering, 103
biomedical research, 19
biotechnology, 83
blinding, 223
bone implant interaction, 55
bone replacement material, 327
bone tumors, 287
bone, 327
buffer, 149
classification, 185
clinical research organization, 241
clinical research, 195
clinical trial, 201, 215, 235, 241
clinicians, 103
complication, 103, 287
consumer product safety/
legislation & jurisprudence, 173
corrosion, 113
cost-effectiveness, 279
critical appraisal, 235
CT data, 31
customized hip prosthesis, 31
data management, 201
degree of freedom, 265
dental materials, 19
design options, 49
design validation, 13
design, 13, 55

device approval, 173
distraction osteogenesis, 139
elbow arthroplasty, 305
electromyography, 41
endpoint assessment, 209
ethics, 19, 83, 123
evidence-based medicine, 235
facial deformity, 139
fatigue, 49
FEA approach, 317
FEA, 31, 157
femoral neck fracture, 149
finite element analysis, 31, 55, 157
finite element modeling, 49
fixed bearing, 1
future, 83
GCP, 215
Global Adjudicator™, 209
Global Educator™, 235
good clinical practice, 195
government regulation, 173
health economics, 279
hexagon crosssection, 271
hip ball, 31
hip implant, 271
hip revision surgery, 157
hip, 149
human tibia bone, 317
humans, 173
humerus, 305
hydroxyapatite, 327
ICH-GCP, 215
implant materials, 113
implant performance, 49
implant, 185, 279
intraoperative neurophysiological
monitoring, 41
joint movement analysis, 265
joint replacement, 55
kinematic analysis, 265
knee arthritis, 13

LCS total knee arthroplasty, 255
mandibular, 139
medical device, 201
medical implants, 49, 123
medical legislation, 173
mobile bearing, 1
nanoparticles, 327
nanotechnology, 83, 103
neural prostheses, 123
neuroprosthetics, 123
neuroscience, 83
neurotechnology, 83
newer technologies, 123
nitinol, 113
optimum fixation, 31
organizational structure, 195
orthopaedic implants, 55
orthopedic clinical trial, 209
orthopedic equipment, 173
orthopedic implant trial, 209
orthopedic implants, 223
orthopedic surgery, 215
orthopedics, 185
orthopedics/legislation &
jurisprudence, 173
osteoarthritis, 149
outcomes assessment, 209
pedicle screw fixation, 41
periprosthetic fractures, 305
policy, 83
polycarbonate, 149
polyurethane, 149
post-market, 173
processing, 323
product surveillance, 173
quality improvement, 249
quality measures, 249
quality of care, 249
radiation therapy, 287
randomization, 223
randomized controlled trial, 223

- regulatory body, 201
replacement, 149
research, e-learning, 235
researchers, 103
responsibilities, 83
retrieval of implant, 157
retrognathia, 139
rotating-platform, 255
shoulder arthroplasty, 305
simulation, 13, 265
skeletal implant, 271
social issues, 83
soft-tissue tumors, 287
- spiral fracture, 313
squatting, 265
standard operating procedures, 195
stress distribution, 55
study design, 223
study error, 223
surface modifications, 113
surveillance, 99
technologists, 103
temporal fascia, 139
temporomandibular, 139
THA, 185
- total hip arthroplasty, 99, 185, 249, 271
total knee arthroplasty, 1, 13
total knee replacement, 249
training, 195
trauma surgery, 215
trial management, 241
trial, 281
TriboFit®, 149
urethane, 149
vibration, 157
