

## EDITORIAL

The *Journal of Enhanced Heat Transfer* has changed publishers from Taylor & Francis to Begell House. This is the first issue to be published by Begell House, and we look forward to working with our new publisher, particularly with Dr. William Begell, owner of Begell House.

Dr. Begell is an internationally known publisher and had a distinguished career in heat transfer research prior to entering the publishing business. He has a wide range of contacts in the heat transfer field, which I am sure will strongly benefit the journal. We feel very fortunate to be aligned with Begell House.

On another matter, it appears that journals are rapidly moving in the direction of electronic processing of manuscripts. The journal joins in this technology advance, and we encourage authors to electronically submit manuscripts for review. They should be sent to me at [RLWebb@psu.edu](mailto:RLWebb@psu.edu) (see the Instructions to Authors for other relevant information). The electronic manuscripts will be transmitted to review editors and reviewers. With electronic transmission and receipt of reviews, we should be able to speed up the review process. However, the length of the review process is, and will remain, limited by getting timely responses from reviewers. So, we encourage all reviewers to help us in giving quick turn-around to requested reviews.

With my best regards,  
Ralph Webb  
Editor-in-Chief
