

TELECOMMUNICATIONS AND RADIO ENGINEERING

Volume 52, Numbers 1–12, 1998

Volume 52, Number 1, 1998

RADAR

V. I. Lutsenko, I. S. Turgenev, and S. I. Khomenko: On Effects Which Can Be Used to Increase the RCS of Small-Sized Targets in an HF Band	1
I. S. Turgenev and S. I. Khomenko: Effect of the Proximity of the Decametric Waveband Antenna to an Agitated Sea Surface	5
V. I. Lutsenko, V. B. Razskazovskii, and S. I. Khomenko: Enhancing the Accuracy of Low-Altitude Target Elevation Measurements by Direction Finders of Sum-and-Difference Type	8
Yu. F. Logvinov, V. I. Kostetskii, Yu. A. Pedenko, and V. B. Razskazovskii: The Effect of Shadows on the Fluctuation Spectra of Millimetric Waves in Multipath Propagation Above the Sea Level	14
A. D. Abramov, V. B. Razskazovskii, and V. G. Sugak: An Algorithm for Detecting a Useful Signal in the Background of Interference Reflections From the Water Surface	21
A. V. Omel'chenko, A. A. Shapiro, and F. V. Kivva: On Resolution Algorithms for the Mixture of PM Signals in the Presence of Gaussian Noise	24
O. Yu. Kamyshanov, Yu. A. Kopylov, and A. S. Tishchenko: Some Features of the Coherent Signal Processing in the Receiving Section of the Radio Vision System	32
A. I. Timchenko: Probing of Small Size Subsurface Objects	40
V. N. Gorobets, V. G. Gutnik, F. V. Kivva, V. A. Kortunov, and G. G. Maikov: Peculiarities of the Doppler Spectra of Microwave Signals Scattered by Sea Craft and by Wave Formations Generated by Them	45

MICROWAVE ELECTRODYNAMICS

L. A. Rud': An Effective Algorithm for Solving the Waveguide Bifurcation Problem for a Semi-Infinite Plate of Small Thickness and its Application to the Design of Millimeter-Wave Bandpass Filters	52
A. D. Barkov and V. F. Naumenko: Excitation of a Dielectric Layer by the Beveled End of a Plane-Parallel Waveguide (Large Protrusions)	58
A. D. Barkov and V. F. Naumenko: An "Open" Modification of the Branched Waveguide (H-Polarization)	65
E. G. Bessonov, Yu. K. Sidorenko, and N. P. Yashina: Algorithms for Solving Problems of Nonstationary Electromagnetic Wave Propagation in Weakly Irregular Waveguides	73
A. G. Kovalenko, V. N. Koshparenok, and Yu. V. Maistrenko: Microwave Filters on the Basis of Electromagnetic Helmholtz Resonators	77
A. A. Bulgakov and V. V. Moskalenko: Dispersion of Surface Polaritons in Superlattices and Their Interaction With Active Waves	81

SEMICONDUCTOR AND QUANTUM ELECTRONICS

E. D. Prokhorov and S. I. Sanin: Effect of the Electrophysical Parameters of Gunn Diodes on the Operation of Frequency Multipliers	87
O. V. Botsula and E. D. Prokhorov: Analysis of Stochastic Current Oscillations in GaAs:Cr-Based Diodes	90
D. N. Makovetskii: Induced Phonon Emission in an Impurity Paramagnet Under Strong Electromagnetic Pumping	97

Volume 52, Number 2, 1998

MICROWAVE ELECTRODYNAMICS

A. E. Kogut, V. V. Kutuzov, Yu. F. Filippov, and S. N. Khar'kovskii: Whispering-Mode Quasi-Optical Hemispherical Dielectric Resonator	1
V. I. Bezborodov, M. S. Yanovskii, and B. N. Knyaz'kov: Linear-to-Circular Polarization Converter	9
O. V. Bondarenko, V. B. Kazanskii, and N. N. Kolchigin: Design of Radioabsorbing Materials of Diffraction and Interference Types	13

SEMICONDUCTOR AND QUANTUM ELECTRONICS

Yu. E. Kamenev, E. M. Kuleshov, and A. A. Filimonova: Waveguide HCN-Laser With an Internal Linear Polarizer	18
Yu. V. Arkusha: Effect of Sample Doping Profiles on the Measurement of the $V(E)$ -Dependence Using the Microwave Method	21
Yu. V. Arkusha: Effect of a Metallic Cathode Contact on the Energy Characteristics of Short Gunn Diodes	24
N. A. Shekhovtsov: Radiation Absorption by Weakly Doped p -Germanium in the Millimetric Band	27
A. A. Kirilenko, L. A. Rud', S. L. Senkevich, and V. I. Tkachenko: Synthesis and Analysis of Small-Size Corrugated Rectangular Waveguide Low-Pass Filters	33
V. I. Tkachenko and A. I. Fisun: Simulation of Natural Oscillations in a Corner-Echelette Open Resonator (E -Polarization)	42

APPLIED RADIOPHYSICS AND INDUSTRIAL ELECTRONICS

Yu. E. Gordienko, B. G. Borodin, and V. I. Smuglii: Microwave Photomodulation Method for the Study of Recombination Processes in Semiconductors	47
A. G. Pashchenko and V. M. Vantsan: A Study of Wannier-Mott Exciton Stationary Energy States in Semiconductor Injection Lasers Based on Size-Quantized Structures	53
T. L. Altukhova and V. G. Kotukh: Laser Weld Formation Process in Sealed Joints of Electronic Modules	57
A. D. Cherenkov: Open Cavity Resonators as Measuring Cells for Monitoring the Variations in Permittivity of Biological Substances	61
A. D. Cherenkov: Use of Low-Energy Electromagnetic Fields in Agriculture Technology	66
A. D. Cherenkov: Theoretical Analysis of Instrument Transducers for Monitoring the Extremely Weak Luminescence of Biological Objects	69

RADIO ENGINEERING

D. M. Piza: Fast-Acting Polarimeters With Correlation Feedback	73
D. M. Piza: Realization of a Polarimeter Based on an Adaptive Filter	77
N. A. Varlamova and A. I. Tereshchenko: On the Quality Factor of Cavity Resonators of Different Shapes	79
L. P. Yatsuk: Mutual Admittance of Arbitrarily Oriented Slots in an Infinite Plane Ideally Conducting Screen	86
L. P. Yatsuk: X -shaped Slot Cut in a Waveguide With Reflecting Termination	89
W. Freude and I. A. Sukhoivanov: Carrier Transport Effects in SCH Laser Diodes	93
V. V. Lysak: Analysis of the Effect of Electron Concentration on Amplification in Semiconductor Lasers	97
M. F. Lagutin, A. A. Zaprudnyi, V. L. Basetskii, and V. G. Pletnev: Flashlamp-Pumped Dye Lasers for Studying the Atmosphere	100

Volume 52, Number 3, 1998

RADIO ENGINEERING AND RADAR

R. I. Belous and A. P. Motornenko: Propagation of Ionizing Electromagnetic Waves in Plasma Waveguides	1
---	---

Yu. I. Voloshchuk and I. A. Milutchenko: Characteristics of a Radio Meteoric Scatter System for Intercomparing Time Scales	6
Yu. E. Gordienko, Yu. I. Gud, and I. V. Sukhorukov: Progress in Semiconductor Resistivity Measurements Using Noncontact Microwave Test Equipment	12
B. V. Dzyundzyuk, I. V. Naumeiko, and P. N. Maslov: Calculation of Radiation at Junctions in Inhomogeneous Multimode Guiding Systems	16
I. P. Zakharov and N. V. Shtefan: Identification of the Dynamic Characteristics of Aperiodic Microwave Power Transducers	19
V. G. Kryzhanovskii and Yu. V. Rassokhina: Wave Type Transformer Using Rectangular Waveguide <i>E</i> -plane <i>T</i> -Junction	24
E. V. Kuz'micheva: Random Error in the Measurement of the Direction Angle of Linear Laser Radiation Polarization by Nonlinear Thin-Wire Bolometers	28
N. I. Matyukhin: Determination of Performance Time for the Complete Set of Operations in a Multifunction Radar System With Arbitrary Time Distributions of Particular Operations	32
G. I. Khlopov: Expansion of the Directivity Pattern of Millimetric-Band Beamguide Feeds	37

REMOTE SENSING FROM AEROSPACE PLATFORMS

A. I. Kalmykov, A. S. Kurekin, and V. N. Tsymbal: Radiophysical Research of the Earth's Natural Environment From Aerospace Platforms	41
G. P. Kulemin, V. G. Sugak, T. N. Kharchenko, and N. G. Zerdev: Detection of Soil Erosion by the Double-Polarization Radar Method	53

MICROWAVE ELECTRODYNAMICS

R. I. Belous, Yu. G. Makeev, and A. P. Motornenko: Spectrum of the Natural Electromagnetic Oscillations of a Waveguide Ferrite Resonator	62
E. V. Belousov, V. G. Korzh, V. N. Koshparenok, and Yu. V. Maistrenko: Coupled Resonators in Measurements of the Dielectric Parameters of Thin Films	67
E. M. Ganapol'skii: Stochastic Resonator as an Accumulator of Microwave Electromagnetic Energy in the Millimetric Waveband	72
I. V. Ivanchenko: Electrodynamical Properties of Small-Aperture Two-Mirror Open Resonators with Inhomogeneities	78
L. P. Mos'pan: Use of Ridged Resonant Diaphragms in a Rectangular Waveguide	86
V. D. Sakhatskii: Existence of Fast Surface Waves of <i>H</i> -Type	93

SEMICONDUCTOR AND QUANTUM ELECTRONICS

A. D. Menyailo, I. V. Salai, A. M. Titarenko, and P. I. Cherednikov: Analysis of Stability of a Lossless Parametric Zone System by the Phase-Plane Method	95
V. N. Skresanov and A. I. Shubnyi: Two Regimes of High-Frequency Generation of a Gunn Diode in an Open Resonator	99

Volume 52, Number 4, 1998

RADIO ENGINEERING AND RADAR

A. I. Dokhov, V. V. Zhirnov, S. N. Matyushenko, and L. Z. Sakhnovskaya: Possible Causes and Sources of Angel-Type Radar Clutter	1
A. I. Dokhov, V. V. Zhirnov, S. N. Matyushenko, and L. Z. Sakhnovskaya: Principles of Protection Against Angel-Type Radar Clutter	7
N. I. Matyukhin: Multistatic Coherent Radar System	12
O. Ya. Rafalovich: Analysis of Digital Satellite Communications Systems According to the Criterion for Interference Immunity of Reception and Transmission of Information	15
I. S. Turgenev and S. I. Khomenko: On Ionospheric Clutter in Surface-Wave HF Radars	18
Yu. I. Voloshchuk and I. A. Milutchenko: Study of the Structural Selectivity of a Meteor Multistatic Radio System. 1. Statement of the Problem	20

I. A. Milutchenko: Study of the Structural Selectivity of a Meteor Multistatic Radio System. 2. Calculation of the Structural Factor	24
S. A. Vorob'ev: A Nonparametric Memory Control Algorithm in the Problem of Adaptive Filtering	29
I. I. Zinenko, V. P. P'yankov, and V. P. Chumachenko: Application of the Domain Product Method for Analyzing <i>E</i> -plane Complex-Shaped Radiators With Polygonal and Circular Inserts	32

MICROWAVE ELECTRODYNAMICS

I. K. Kuz'michev: Mirror-Lens Open Resonator	37
Yu. M. Penkin: Solving the Problem of Exciting a Spherical-Layer Structure by Radial Currents	43
V. M. Volkov and S. A. Bortnik: Attenuation in a Coaxial Two-Layer Absorbing Wall	48
V. M. Volkov and S. A. Bortnik: Temperature Field of a One-Dimensional Coaxial Absorbing Wall	52
L. P. Yatsuk: Transverse Slots in a Rectangular Waveguide Filled With a Layered Dielectric	56
L. P. Yatsuk: Physical Properties of Transverse Slots in a Rectangular Waveguide Filled With a Layered Dielectric	61

SEMICONDUCTOR AND QUANTUM ELECTRONICS

D. N. Makovetskii: Microwave Valve Properties of a Nonequilibrium Paramagnetic Related to Spatial Symmetry Breaking of the Inversion States of Active Impurity Ions	66
L. V. Yurchenko: Dynamic Chaos in a Two-Dimensional Cavity Resonator Having an Active Wall with <i>N</i> -Type Current-Voltage Characteristic	71
V. B. Yurchenko: Theoretical Analysis of the Mechanism of Electron Superemission From Semiconductors in a High Microwave Field	78

APPLIED RADIOPHYSICS

N. P. Mustetsov and O. A. Karabanova: Possibilities of Laser Methods in Laboratory Diagnostics	83
O. S. Shostko, I. S. Shostko, Yu. F. Lonin, V. I. Chumakov, S. N. Shostko, N. N. Gorobets, and L. L. Dubrovskaya: Bactericide Action of High-Power Pulsed Ultra-Violet Radiation	86

CRYPTOGRAPHY

I. D. Gorbenko, V. I. Dolgov, V. I. Rublinetskii, and K. V. Korovkin: Methods of Information Protection in Communications Systems and Methods of Their Cryptoanalysis	89
A.V. Potii and A.K. Pesterev: A System Approach to Certification of Pseudorandom Numbers Generators Used in Information Protection Systems	97

Volume 52, Number 5, 1998

RADAR AND RADIO-WAVE IMAGING

A. I. Kalmykov, I. M. Fuks, V. N. Tsymbal, I. V. Shcherbinin, A. Ya. Matveev, A. S. Gavrilenko, M. E. Fiks, and V. D. Freilikher: Radar Observation of Strong Subsurface Scatterers. Model of Subsurface Reflections	1
Yu. A. Kopylov and A. S. Tishchenko: Optical Registration of Dynamic Radio Holograms	18
Yu. F. Logvinov: Shadowing Effect on the Statistical Characteristics of Specular Elements in the Multipath Propagation Over Sea	22
Nguyen Suan An' and Yu. V. Kornienko: Determination of the Relief and Radiooptical Parameters of a Surface Area by Means of a Synthetic Aperture Radar	29

RADIO ASTRONOMY

V. Yu. Mikhailishin and I. N. Yavorskii: Statistical Analysis of Radiophysical Processes with Hidden Periodicity	34
S. V. Stepkin: Digital Sign Correlator for Radio Astronomical Spectroscopy	47

APPLIED RADIOPHYSICS

V. K. Kiselev, E. M. Kuleshov, Yu. E. Kamenev, V. I. Makolinets, G. F. Klyucheva, N. V. Dedukh, N. V. Isakova, O. P. Timoshenko, and F. S. Leontieva: Effect of Submillimeter-Wave Low-Intensity Laser Radiation on the Regeneration of Bone Tissue	52
V. K. Kiselev, E. M. Kuleshov, Yu. E. Kamenev, V. I. Makolinets, O. P. Timoshenko, and B. N. Shevtsov: Use of Coherent Submillimeter-Wave Radiation for Controlling Metabolic Reactions in Living Organisms	56
V. N. Polupanov, N. F. Dakhov, V. K. Kiselev, and V. N. Seleznev: A Study of Iron Borate in the Submillimeter Waveband	58
V. A. Storozhenko, V. A. Maslova, and O. V. Banduryan: Application of Interactive Cognitive Graphics Technologies to the Analysis of Temperature Fields in Inhomogeneous Structures	61
V. A. Storozhenko, S. N. Meshkov, and V. A. Maslova: Instrumentation and Techniques for Quality Control of Space Technology Products	64

VACUUM AND SEMICONDUCTOR ELECTRONICS

A. I. Dmitriev, G. V. Lashkarev, V. K. Kiselev, V. K. Kononenko, and E. M. Kuleshov: A Study of Photoresponse of Layered InSe Semiconductors to Electromagnetic Radiation in the Submillimeter Waveband	68
N. A. Popenko: Nonlinear Effects in a Three-Mirror Open Resonator With Semiconductor	71
A. I. Tsvyk, A. V. Nesterenko, and K. A. Pushkarev: Polarization Effects in Current Deposition During Excitation of Cherenkov Radiation by a Nonrelativistic Electron Beam in an Isotropic Dielectric	79
Yu. Ya. Volkolupov, M. A. Krasnogolovets, and R. Yu. Allakhveranov: High-Current Electron Beam Accelerator	85

RADIO ENGINEERING

V. N. Polupanov: A Gyromechanical Model of the Faraday Effect	89
I. V. Vasil'ev, V. I. Klets, and I. D. Revin: Band-Rejection Filter With Smooth Retuning of the Frequency and Rejected Spectrum Band	93

Volume 52, Number 6, 1998

ELECTRODYNAMICS

I. S. Fal'kovich: Polarization of Radiowaves in the Ionosphere: Magnetoionic Theory and Quasi-Isotropic Approximation	1
A. A. Galuza and A. S. Mazmanishvili: Time Characteristics of an Electromagnetic Pulse in a Homogeneous Absorbing Diffusion Medium	7
G. É. Karvitskii and S. L. Prosvirnin: Diffraction of the Natural Waves of a Dielectric Slab at a Periodic Grating of Rectangular Patches	10
L. A. Pazynin and V. E. Filippenko: A Model of Wave Propagation in a Quasihomogeneous Medium	17
Yu. M. Penkin: Radial Electric Current Excitation of Electrodynamical Volumes Bounded by Impedance Spherical Surfaces	26
S. A. Pogarskii: Diffraction of Natural Waves of an Isolated Mirror Dielectric Waveguide at a Semi-Infinite System of Microstrip Resonators	29
O. A. Tret'yakov and S. V. Chumachenko: Oscillations in a Resonator Filled With a Time-Varying Dielectric Medium	36

RADIO ASTRONOMY

- A. A. Konovalenko, K. P. Sokolov, and S. V. Stepkin: Determination of Optimal Operating Frequencies for Observations With the Use of the UTR-2 Radio Telescope in the Sky Surveying Mode 46

USE OF RADIO ELECTRONICS FOR STUDYING THE ATMOSPHERE

- A. G. Karabanov: Some Results of the Modernization of a Vertical Probing Atmospheric Radar 58
- A. G. Karabanov: Return Signal Processing in Vertical Probing Atmospheric Radars 63

ANTENNAS

- V. V. Dolzhikov: Longitudinal Field Strength Distribution in the Fresnel Zone of a Round Focused Aperture 70
- V. V. Dolzhikov: Mean Power-Directivity Diagram of a Round Aperture in the Presence of Phase Fluctuations 79
- A. I. Luchaninov, V. M. Shokalo, A. A. Konoval'tsev, A. M. Rybalko, and A. A. Shcherbina: Theoretical and Experimental Studies of Large-Aperture Rectenna Arrays 87
- I. S. Radkevich: An Algorithm for Estimating Signal Spatial Parameters by an Antenna Array With Synthetic Aperture 93
- V. M. Shokalo, A. A. Konoval'tsev, and Yu. A. Luchaninov: Decrease in the Directivity of Spurious Radiation of Rectenna Arrays 97

RADAR

- A. V. Vorgul': Determination of the Velocity of a Meteor Body by Using Simulation Techniques 101

Volume 52, Number 7, 1998

RADIO ASTRONOMY

- V. M. Kartashev, A. V. Lazarev, D. V. Soroka, and E. S. Shmatko: Synchrotron Radiation Bursts of Electrons Lost From the Inner Radiation Belt of the Earth 1
- V. M. Kartashev and E. S. Shmatko: Method of Observing Superhigh-Energy Cosmic Gamma-Ray Photons by Recording Coherent Radio Emission Pulses of Extensive Air Showers 11
- V. N. Mel'nik: On the Influence of an Electric Field on Electron Beam Propagation in Solar Magnetic Arches 25
- N. A. Tsvyk: Mechanisms Forming Negative-Curvature Spectra of Discrete Decametric Radio Sources 29
- Yu. M. Yampol'skii, V. S. Belei, S. B. Kashcheev, B. V. Lazebnyi, V. E. Paznukhov, and A. G. Rokhman: Effect of the Intermodal Cross-Modulation of Schumann Resonances 43

USE OF RADIO ELECTRONICS FOR STUDYING THE ATMOSPHERE

- V. I. Alekhin: Boundary Atmospheric Layer Studies With the Acoustic Sounding Method 51
- S. I. Babkin, I. A. Delov, and G. Proshkin: Equipment Complex for Combined Sounding of the Atmospheric Boundary Layer by Electromagnetic and Acoustic Waves 57

RADAR REMOTE SENSING

- A. G. Boev and G. É. Karvitskii: A Theory of Radar Sea Contrast for a Surfactant Film. I. Resonance Scattering 61
- A. G. Boev and G. É. Karvitskii: A Theory of Radar Sea Contrast for a Surfactant Film. II. Small Incidence Angles 70

ELECTRODYNAMICS

V. V. Kulish and A. G. Kailiuk: Subharmonic Generation in a Cyclotron-Resonance Maser	75
S. A. Pogarskii: Excitation of Multimode Resonators of a Regular Geometric Shape	81
L. G. Velichko and Yu. K. Sirenko: Synthesis of Reflecting Gratings With Patches of Arbitrary Profile	87

APPLIED RADIOPHYSICS

V. V. Kuz'min and V. G. Sugak: On the Possibility of a Radiophysical Monitoring of the Earth's Subsurface Structure	94
---	----

Volume 52, Number 8, 1998

ELECTRODYNAMICS

A. A. Galuza and A. S. Mazmanishvili: Time Characteristics of a Pulse Propagating in Nonhomogeneous Nondissipative Medium	1
N. N. Kolchigin, S. N. Pivnenko, and V. M. Lomakin: Influence of Losses in a Dielectric Half-Space on the Characteristics of a Reflected Three-Dimensional Pulsed Beam	8

RADIO ENGINEERING

V. I. Antyufeev, V. N. Bykov, and B. I. Makarenko: Efficiency of Zone Algorithms for Object Locating on Radiometric Images	14
Yu. N. Agafonov, V. I. Antyufeev, V. N. Bykov, and A. M. Grichanyuk: Potential Accuracy in Measuring Object Coordinates by Earth Surveying Matrix Systems	18
Yu. P. Babkov, V. I. Vasilishin, and I. V. Kovalenko: Effect of Signal Multifrequency Sampling on the Efficiency of Beamspace Eigenvector Algorithms	22
V. I. Chumakov: Raising the Current Build-Up Rate in Explosive Magnetic Generators with Capacitive Loads	26
A. A. Kostenko: Comparative Analysis of Characteristics of One-Dimensional Small-Period Diffraction Gratings in the Millimeter and Submillimeter Wavebands	32
A. Yu. Panchenko: Modeling a Small Aperture Resonator Type Microwave Meter of Substance Parameters	42
N. S. Pastushenko and S. V. Petrov: Procedure and Results of Estimation of the Effect of Errors in Initial Conditions on the Spacecraft Efficiency	45
I. S. Radkevich: Performance Analysis of Subspace-Based Algorithms for Estimating the Direction of Arrival of Partially Coherent Signals	49
A. I. Strelkov, A. M. Stadnik, A. P. Lytyuga, and T. I. Strelkova: A Comparative Analysis of Probabilistic and Determinate Methods for Attenuating Light Flux	54

ANTENNAS

U. P. Liepin' and Yu. V. Petrashko: An Estimation Procedure for the Spectrum of Amplitude-Phase Distribution in Phased Arrays	58
L. A. Titarenko: Quasiminimax Approach to the Design of Robust Adaptive Antenna Arrays	63

SEMICONDUCTOR AND QUANTUM ELECTRONICS

V. M. Bakumenko, L. D. Fesenko, and A. V. Bakumenko: Determination of Relaxation Constants of CH ₃ CN Molecules	66
V. G. Kryzhanovskii and I. N. Shevchenko: Effect of Collector Current and Voltage Profiles on the Efficiency of Transistor Microwave Power Amplifiers of Class F(H) With Parametric Effects Taken Into Account	68
S. N. Shostko, Yu. F. Lonin, V. I. Chumakov, I. S. Shostko, E. A. Avchinnikov, and O. S. Shostko: A Study of the Effects of High-Power Wide-Band Optical Radiation on Optoelectronic Devices	73

I. A. Sukhoivanov and M. V. Samokhvalov: Effect of Temperature Dependence of the Amplification Factor on the Dynamic Behavior of Vertical Cavity Surface Emitting Lasers	78
--	----

COMMUNICATION

L. A. Titarenko: Adaptive Spatial Filtering Algorithm for Mobile Communications Networks	83
V. N. Zakharchenko, I. A. Kireev, V. V. Topalov, and A. I. Lipchanskii: Performance of One-Way Transmission Systems Using Multiposition Time Duration Signals	86
V. N. Zakharchenko, V. V. Topalov, A. P. Uleev, and A. I. Lipchanskii: Error Grouping Effect in Binary Digital Signal Constructions	91
A. V. Zimenko, A. P. Uleev, A. V. Draganov, and V. P. Gaidar: Start-Stop Receiver Lock-In Time in Systems Using Multiposition Time Duration Codes	97

Volume 52, Number 9, 1998

ELECTRODYNAMICS

Yu. I. Evdokimenko and A. P. Narezhnii: Identification of Group Measurements of Frequency by Using Iteration Methods of Solving Stationary Problems	1
N. K. Blinova and L. P. Yatsuk: Applicability of the Energy Method for Computations of Amplitude-Phase Distributions in Linear Waveguide Slotted Antenna Arrays	4
S. V. Chumachenko: Vortex Oscillations in a Resonator in Media With Nonlinear Dissipation	10
V. V. Khoroshun: Modification of the Riemann–Hilbert Method for the Case of Oblique Incidence of a Plane Electromagnetic Wave on a Strip-Type Array	13
Yu. O. Korenyak: Ohmic Resistance Between Pairs of Complex-Shaped Electrodes on a Surface With Prescribed Conductivity	17
Yu. M. Penkin: Admittance of Slots With Coordinate Boundaries in a Half-Infinite Rectangular Waveguide With Impedance Endface	22
I. Yu. Vorgul': Transformation of a Nonsymmetric Cylindrical Field in a Nonstationary Conducting Medium in the Two-Dimensional Case	27
K. P. Yatsuk and R. R. Shvelidze: Polarization Transformer in a Circular Waveguide With a Spiral	29

RADIO ENGINEERING

N. N. Gorobets, V. I. Chebotarev, and G. M. Chekalin: Formation of the Polarization State of Spectral Harmonics	33
Yu. I. Evdokimenko and A. P. Narezhnii: Identification of Group Measurements of Frequency by Using Iteration Methods of Solving Stationary Problems	37
N. N. Kolchigin and N. I. Vasil'chenko: Experimental Method of Sectioning for Determining the Radar Cross-Section of Complex Objects	40
S. I. Martynenko: Simulation of the Regular Structure of Ionospheric Disturbances Produced by a Release of Chemical Reagents	43
S. N. Pivnenko: Justification of the Pulse Method of Measuring Dielectric Parameters in Free Space	49
N. G. Zuev, I. V. Salai, A. M. Titarenko, and P. I. Cherednikov: On Parametric Regeneration of Oscillations	53
V. P. Titar': Effect of Surface Roughness on the Polarization State of Reflected Radiation	58
V. P. Titar' and T. V. Bogdanova: Spatial Filtering With a Discrete Nonequidistant Array	64

QUANTUM ELECTRONICS

V. M. Kuz'michev and S. V. Pogorelov: Transient Processes in Thin-Film Bolometers of Laser Focal Beam	77
V. P. Titar': Some Properties of Open-Resonator Laser Systems	80

ELECTRONICS

E. N. Odarenko, V. S. Chursin, and A. A. Shmat'ko: Nonlinear Two-Dimensional Theory of Relativistic Resonant O-Type Oscillators 88

RADAR

N. I. Matyukhin: A Differential Game Method for Dynamic Synthesis, Analysis, and State Control of a Holographic Radar System With Enhanced Multifunction Dynamic Performance Capability 91

ANTENNAS

N. N. Gorobets, N. K. Blinova, Yu. N. Gorobets, Yu. V. Lytov, and V. S. Popov: Microstrip Antenna Array for Side-Looking Radars 96

Volume 52, Number 10, 1998

ELECTRODYNAMICS

D. B. Kucher: Study of Electromagnetic Wave Propagation on the Surface of a Superconducting Film 1
 S. D. Prijmenko and N. A. Khizhnyak: Resonant Excitation of an Impedance Dipole Antenna in a Circular Waveguide 4
 L. V. Vavriv and A. E. Serebryannikov: Scattering of Nonsinusoidal Waves by an Array of Rectangular Beams in a Parallel-Plane Waveguide 10

RADIO ENGINEERING

V. V. Bavykina and O. L. Troshchin: Numerical Study of Robust Procedures for Meteoric Time Scale Comparison Error Estimation 14
 S. A. Bortnik and V. M. Volkov: Conversion Efficiency for a Coaxial Two-Layer Absorbing Wall-Based Transient-Power Transducer 20
 E. E. Getmanova and A. G. Reuka: Phase Trajectories of a Linear One-Dimensional Oscillator in Transient Regimes of Oscillations Induced by a Series of Rectangular Pulses 26
 L. V. Golovkina, I. V. Salai, and P. I. Cherednikov: A Method for Representation of Coupling Functions of Parametric Systems 29
 N. N. Gorobets and G. M. Chekalin: Synthesis of Vector Signals 32
 O. I. Kadatskaya: Errors of the Parallel Averaging Method for Single Time Interval Conversion 36
 A. Yu. Panchenko: Application of Modulation Principles for Increasing the Information Capacity of Microwave Transducers 38

COMMUNICATION

V. I. Gorbach and M. V. Kolomiets: Meteor Burst Communication. Specific Features, Benefits, and Fields of Application 41
 V. I. Gorbach and M. V. Kolomiets: Channel Capacity Maximization for the Meteor Burst Radio Communication System 46
 Yu. Yu. Kolyadenko: A Nonlinear Stochastic Model of Space-Time Processing of Communication Signals 49
 O. Ya. Rafalovich: Estimation of the Effect of Phase Modulation Multiplicity on the Information Reception-Transmission Quality in Digital Satellite-Communication Systems 53

RADAR

R. Z. Grinshpun: Spectral Analysis of the Amplitude-Time Characteristics of Signals Reflected from Unsaturated Meteor Trails 56
 V. I. Zamyatin, O. V. Baturin, É. A. Tolokneev, and A. V. Perekatii: Superfast Scanning of the Circular-Array Beam 60

V. V. Zhirnov, V. S. Komisaruk, and L. Z. Sakhnovskaya: Choice of Adaptive Decision-Making Threshold for Multiscan Signal Processing in Surveillance Radar Systems	64
--	----

RADAR REMOTE SENSING

V. I. Antyufeev, V. N. Bykov, A. M. Grichanyuk, V. A. Krayushkin, Yu. V. Ovsyannikov, and M. G. Shokin: Microwave Radiometer Measuring System for Remote Sensing of the Earth's and Water Surfaces	67
A. M. Gokov: Generation of Low-Frequency Whistlers by Infrasonic Waves in the Ionospheric <i>E</i> -Region During Disturbances of a Various Nature	72
A. S. Mazmanishvili, E. V. Rogozhkin, and V. A. Antonova: Bias Effect for the Estimates of Ionospheric Plasma Parameters in the Processing of Incoherent Scattering Data	75
V. A. Petrov and V. M. Kartashev: Nonlinear Effects in the Propagation of Intense Acoustic Waves in Atmosphere Sounding Problems	80
D. M. Piza and S. V. Morshchavka: Selection of Spectral Bands for Recognizing Plant Species by Reflection Characteristics in the Optical Region	83

SEMICONDUCTOR AND QUANTUM ELECTRONICS

V. A. Antonova, V. N. Borshchev, A. M. Listratenko, and N. I. Slipchenko: New Constructive and Technological Solutions for Creation of High-Efficiency Large-Area Silicon Photoreceivers	87
A. I. Fyk: Switching Time of a Superconducting Protective Device in a Waveguide Duct	92
D. B. Kucher and A. I. Fyk: A Study of the Formation of Normal Regions in a Thin Superconducting Film	94
A. G. Pashchenko: Particle and Quasiparticle States in Multilayer Asymmetric Size-Quantized Structures	97

Volume 52, Number 11, 1998

ELECTRODYNAMICS

A. A. Bulgakov: Nonlinear Interaction of Waves in Laminated Optical Systems	1
M. V. Davidovich: Two-Dimensional Integral Equations Used for Studying Optical Waveguides	10
I. V. Gerasimchuk and A. S. Kovalev: Propagation of Light Beams in a Focusing Optical Medium with a System of Parallel Waveguides	15
E. E. Getmanova, D. B. Kostarev, and A. G. Reuka: Bifurcational Variations of the Structure of the Precessing Elliptic Trajectory of a Particle in the Coulomb Field Under the Action of Small Perturbations	17
N. G. Kokodii: Electromagnetic Wave Scattering from a Radiation Amplifying Cylinder	20

RADIO ENGINEERING

V. V. Danilov: Acousto-Optic Shutters	25
V. V. Danilov: Choice of Acousto-Optic Guide Media for Acousto-Optic Devices	30
A. A. Gurko: On the Concept of Assisting Modes in a Coaxial Magnetron	34
A. A. Gurko: Non- π -Mode Coaxial Magnetron	39
A. A. Kostenko and G. I. Khlopov: Quasioptical Combiners with One-dimensional Diffraction Gratings	45
S. O. Martynenko and A. I. Tereshchenko: Dependence of Photoreceiver Parameters on p-i-n Diode Structure	51

LASER ENGINEERING

A. A. Afonenko, V. K. Kononenko, and I. S. Manak: Mathematical Modeling of Laser Generation Regimes Using Asymmetric Size-Quantized Heterostructures	57
--	----

M. M. Bykov and N. G. Skrinnik: Modeling of Kinetic Processes in CO ₂ Lasers with Phototropic Modulator	63
V. N. Bykov, A. S. Vil'chinskii, and E. D. Prilepskii: Control of Monochromatic Radiation Intensity Distribution near the Focal Point	68
M. I. Dzyubenko, V. V. Maslov, V. P. Pelipenko, and V. V. Shevchenko : A Study of the Main Dye Laser Radiation Characteristics for Different Temperature Regimes of the Active Element	72
O. V. Gurin, V. A. Maslov, I. M. Militinskii, V. A. Svich, and A. N. Topkov: Formation of Beams with Uniform Intensity Profile in Laser Cavities	77
A. N. Manzhura: Analysis of the Transfer Characteristics of SQW Lasers	84
I. A. Sukhoivanov: A Study of the Near Field and Dynamic Behavior of Semiconductor Surface Emitting Lasers with Regard for Spatial Hole Burning	89

COMMUNICATION

V. V. Storozhenko: Models of VHF and UHF Radio Wave Propagation Used for Solving Electromagnetic Compatibility Problems	97
