

Journal of Environmental Pathology, Toxicology, and Oncology

Index to Subjects

Volume 26, 2007: Issue 1, 1–73; Issue 2, 75–164; Issue 3, 165–243;
Issue 4, 245–322

- 1,2-diethyl-3-hydroxypyridin-4-one hydro-chloride (CP94), 89
5-aminolaevulinic acid (5-ALA), 75, 89, 135, 143, 149, 157
ALA, 149, 173
ALA-induced protoporphyrin IX, 83
alkaline comet assay, 29
all-trans-retinol, 221
anticancer agents, 1
antioxidant activity, 207
antioxidant, 21, 263, 273
apoptosis, 63, 75, 173
arsenic, 29, 207
asbestos, 281
- basal cell carcinoma, 117
Bcl-2, 63
benzo(a)pyrene, 281
bivalve, 263
black tea, 207, 245
bladder cancer, 143
bleaching, 117
bone marrow cells, 29, 185
bone, 255
BPDE, 281
brain tumor, 157
brain, 255
breast cancer, 173
- cadmium, 21, 185
calcium glucarate (Cag), 63
caspases, 63
central nervous system, 305
chemoprevention, 195
cobalt complex, 1
colorectal, 135
combination effects, 165
comet assay, 39, 263
curcumin, 273
- depigmentation, 165
desferrioxamine (DFO), 89
detoxification, 245
diltiazem, 185
dl- α -tocopherol, 221
- DMBA, 63
DNA damage, 29, 207, 263
DNA repair, 207
drug delivery, 105, 135
- endocrine disruptors, 51
endonuclease, 63
epidermis, 63
erythropoietin, 185
eugenol, 273
- F98 rat glioma, 149
fluorescence cystoscopy, 143
fluorescence, 117
fluorescence-guided resection, 157
focal contacts, 83
- gene expression profiling, 51
genetic profilingbenzo(a)pyrene, 281
glioblastoma cells, 83
glioma, 157
glutathione, 21
green tea, 207
GSH, 1
GST, 1
- Helicobacter pylori*, 39
hepatotoxicity, 245
hexaammine cobalt (III) chloride, 1
hexaminolevulinic acid, 143
human cell strains, 51
hyperproliferation, 9
- interstitial PDT, 157
intestine, 21
ionizing radiation, 273
iron chelator, 89
- kidney, 255, 305
- L-ascorbic acid, 273
light sources, 127
lipid peroxidation, 21, 39, 185, 255
liver and kidney function, 1
lymphocytes, 263
- malondialdehyde, 221
melanotic melanomas, 165
mercury amalgam restorative material, 305
mercury vapor, 305
methyl 5-aminolevulinic acid, 165
methyl aminolevulinic acid, 295
mice, 29
microarray, 281
mTHPC, 117
mussel hydrolysate, 263
- necrosis, 75, 173
neutral comet assay, 29
NHBE, 281
nodular basal cell carcinoma, 295
- oral infections, 127
oral non-neoplastic lesions, 127
oral squamous cell carcinomas, 127
oxidative stress, 9, 195, 207, 255
oxygen pressure injection, 295
- p53, 63
PARP, 63
photodynamic therapy (PDT), 75, 83, 89, 105, 117, 127, 149, 157, 165, 173, 295
penetration, 295
photodynamic, 135
photosensitisation, 75
photosensitizers, 127
phthalate, 51
Picrorrhiza kurroa, 195
plasma membrane, 83
plasmid, 263
polyphenols, 207
porphyrin, 89
protoporphyrin IX (PPIX), 89
- radioprotection, 263
reactive oxygen species, 245
reduced glutathione, 185
reproductive defects, 51
ROS, 263

Saudi Arabia 221
selenium, 221
spectroscopic monitoring, 117
stability, 105

tannic acid, 9
Temoporfin topically, 117

testicular cells, 29
thioacetamide, 9
thymic lymphoma, 273
topical application, 105
total internal reflection fluorescence
microscopy (TIRFM), 83
toxicity, 255

transurethral resection, 143
tumor growth, 165
tumor promotion, 195
tumor, 245
uranium, 255

whole body γ -irradiation, 273
