

HEAT TRANSFER RESEARCH

VOLUME 46 CONTENTS, 2015

Page Range of Issues

Issue 1: 1–89; Issue 2: 91–193; Issue 3: 195–309; Issue 4: 311–415; Issue 5: 417–501;
Issue 6: 503–597; Issue 7: 599–687; Issue 8: 689–783; Issue 9: 785–879;
Issue 10: 881–969; Issue 11: 971–1064; Issue 12: 1065–1166

Number 1

- Strain Rate Effect on Microorganic Dust Flame in a Premixed Counterflow** 1
M. Bidabadi, M.A. Vakilabadi, & A. Esmaeilnejad
- Heat Transfer Analysis in the TBC Coated Exhaust Nozzle of Gas Turbines** 13
Ö. Altun
- Numerical Simulation of Convective Heat Transfer and Pressure Drop in Two Types of Longitudinally and Internally Finned Tubes** 31
F. Wu & W. Zhou
- Solution of Slip Flow over a Permeable Plate (with Suction) Embedded in a Porous Medium using the Adomian Decomposition Method–Pade Approximants** 49
N. Dalir, M. Dehsara, S.S.M. Tehrani, & S.S. Nourazar
- Influence of an Adiabatic Square Cylinder on Hydrodynamic and Thermal Characteristics in a Two-Dimensional Backward-Facing Step Channel** 63
D. Chatterjee, A. Sengupta, N. Debnath, & S. De
-

Number 2

SPECIAL ISSUE: HEAT AND MASS TRANSFER IN SORPTION COOLING
GUEST EDITORS: LIWEI WANG & R.Z. WANG

PART 1

- Kinetic Characterization of Expanded Graphite, Calcium Chloride, and Magnesium Hydroxide Composite for the Chemical Heat Pump** 91
S.T. Kim, M. Zamengo, J. Ryu, & Y. Kato
- Simulation of Heat and Mass Transfer Performance with Consolidated Composite Activated Carbon** 109
Y.J. Zhao, L.W. Wang, R.Z. Wang, Z.Q. Jin, L. Jiang, & M. Fleurance
- Simulation Study of the Adsorption Dynamics of Cylindrical Silica Gel Particles** 123
S. Mitra, S.T. Oh, B.B. Saha, P. Dutta, & K. Srinivasan
- Influence of Variable Thermal Conductivity and Permeability of Adsorbents on Simulation: A Case Study of a Two-Stage Freezing System** 141
L. Jiang, L.W. Wang, R.Z. Wang, & Y.J. Dai
- Effect of the Reactor Characteristics on the Performance of a Chemisorption Refrigerator using an SrCl₂ Composite Sorbent** 159
C.J.N. Sanchez, R.G. de Oliveira, & S. Colle
- Wall Contact Thermal Resistance and Bulk Thermal Conductivity in Activated Carbon for Adsorption Generators** 179
A.M. Rivero Pacho & R.E. Critoph

Number 3

SPECIAL ISSUE: HEAT AND MASS TRANSFER IN SORPTION COOLING
GUEST EDITORS: LIWEI WANG & R.Z. WANG

PART 2

Heat Transfer Characteristics of the Multithreaded Helically Coiled Tube Generator used in the Absorption–Compression Hybrid Refrigeration Cycle	195
<i>J. Li, S. Xu, & S. Kong</i>	
Study of a Silica Gel–Water-Based Three-Bed Dual-Mode Adsorption Cooling Cycle	213
<i>A.F.M.M. Rahman, Y. Ueda, A. Akisawa, T. Miyazaki, & B.B. Saha</i>	
Analysis of Sorption Cycles with Integrated Absorber–Evaporators	233
<i>M.J. Tierney, H. Saidani-Scott, & R. Selwyn</i>	
Dynamic Analysis of a Compressor-Driven Chemisorption System with a Gas Cooler under the Time-Delay Cycle	251
<i>Y. Lai, Z. Dong, & M. Lyu</i>	
Investigation of the Absorption–Compression Hybrid Refrigeration Applied to the Coach Air Conditioning	271
<i>J. Li, S. Xu, & S. Kong</i>	
Experimental Investigation of a Reheating Two-Stage Adsorption Chiller Applying Fixed Chilled Water Outlet Conditions	293
<i>I.G.A.B. Wirajati, A. Akisawa, Y. Ueda, & T. Miyazaki</i>	

Number 4

SPECIAL ISSUE: HEAT AND MASS TRANSFER IN SORPTION COOLING
GUEST EDITORS: LIWEI WANG & R.Z. WANG

PART 3

Experimental Investigation of a Small-Scale Thermally Driven Pressurized Adsorption Chiller	311
<i>W.S. Loh, A.B. Ismail, K.C. Ng, & W.G. Chun</i>	
Experimental Study of a Thermally Driven Composite Adsorption Refrigerator	333
<i>Q.W. Pan, R.Z. Wang, Z.S. Lu, & L.W. Wang</i>	
An Experimental Investigation of an Adsorption Ice-Maker Driven by Parabolic Trough Collector	347
<i>C. Li, T. Yan, R.Z. Wang, L.W. Wang, T.X. Li, X. Li, M. Lin, & W.T. Xie</i>	
Dynamic Multiobjective Optimization of a Compressor-Driven Adsorption System by Iterative Dynamic Programming	369
<i>M. Lyu, Z. Dong, & Y. Lai</i>	
Experimental Study on a Two-Stage Liquid Desiccant Dehumidification System using Dual Desiccant Solutions	383
<i>Z.Q. Xiong, R.Z. Wang, & Y.J. Dai</i>	
Thermodynamic Analysis and Comparison of Single Effect Water–Lithium Bromide Absorption Heat Transformer under the High- and Low-Temperature Conditions	399
<i>Z. Hao, X. Ma, & Z. Lan</i>	

Number 5

- A New Method to Determine the Thermal Properties of Soil for Vertical-Borehole Ground-Source Heat Pump Systems** 417
X. Dong & B. Gu
- Proposal of the Shape Layout of Trapezoidal Cavity Receiver to Improve the Optical Efficiency** 429
F. Wang, Y. Shuai, H. Tan, & L. Gong
- Analytical Solution of the Problem of Non-Fourier Heat Conduction in a Slab using the Solution Structure Theorems** 447
M. Akbari, S. Saedodin, D.T. Semiromi, & F. Kowsari
- Mixed Convection Fluid Flow and Heat Transfer of the Al₂O₃-Water Nanofluid with Variable Properties in a Cavity with an Inside Quadrilateral Obstacle** 465
M. Hemmat Esfe, A.H. Refahi, H. Teimouri, M.J. Noroozi, M. Afrand, & A. Karimiopour
- Empirical Correlations for Sizing Adiabatic Capillary Tubes using Conventional Refrigerants and their Alternatives** 483
S. Sulaimon, A.A. Aziz, H. Nasution, & A.N. Darus
-

Number 6

- Three-Dimensional Boundary-Layer Flow over an Exponentially Stretching Surface with Thermal Radiation** 503
M.Y. Malik, S. Rehman, & S. Nadeem
- On Mixed Convection Flow of Jeffrey Fluid over an Inclined Stretching Surface with Thermal Radiation** 515
T. Hayat, M.B. Ashraf, & H.H. Alsulami
- Effects of Blockage Ratio and Prandtl Number on Steady Flow and Heat Transfer around an Inclined Square Cylinder** 541
J. Aboueian-Jahromi, A. Hossein Nezhad, & A. Behzadmehr
- Heat Transfer Performance of a Semi-Circular Tube Bank** 563
E.Z. Ibrahiem & A.O. Elsayed
- A Theoretical Model for Predicting Total Heat Transfer on Compression of a Real Gas: Energy Saving Guide** 577
A. Sowayan
- Preparation and Thermal Performances of Nano-Alumina/Paraffin Composites as a Phase-Change Material** 591
X. Zhang & Z. Han
-

Number 7

- Optimization of the Blade Profile and Cooling Structure in a Gas Turbine Stage Considering both the Aerodynamics and Heat Transfer** 599
L. Luo, B. Sundén, & S. Wang
- Numerical Analysis of Laminar Natural Convection in a Quadrantal Cavity with a Hot Bottom and Cold Curved Walls** 631
D. Sen, P.K. Bose, R. Panua, & A. Das

Dissipative Heat Transfer in Sisko Fluid Peristaltic Flow through a Cylindrical Tube with Nonlinear Slip	643
<i>O.U. Mehmood, N. Mustapha, S. Shafie, & M. Qasim</i>	
Analysis of the Thermal Regulating Properties of Fire-Fighting Protective Clothing with an Incorporated Phase-Change Material	657
<i>H.M.A. Akram & Yu Weidong</i>	
Width Effect on a Vertical RPU Flame Spread with a Middle Linear Ignition	673
<i>H. Zhao, Y. Zhang, Y. Wang, & L. Zhao</i>	

Number 8

Numerical Solution for the Blasius Flow in a Casson Fluid with Viscous Dissipation and Convective Boundary Conditions	689
<i>M. Qasim & B. Ahmad</i>	
Numerical Solutions of Telegraph Equations using an Optimal Homotopy Asymptotic Method	699
<i>S. Iqbal, M.S. Hashmi, N. Khan, M. Ramzan, & A.H. Dar</i>	
Slip Effect on Free Convection Flow of Second Grade Fluids with Ramped Wall Temperature	713
<i>D. Vieru, M.A. Imran, & A. Rauf</i>	
Magnetohydrodynamic Viscous Flow over a Shrinking Sheet in a Second-Order Slip Flow Model	725
<i>T. Mahmood, S.M. Shah, & G. Abbas</i>	
An Inverse Heat Conduction Model for Determining the Casting/Chill Interfacial Heat Transfer Coefficient	735
<i>L. Zhang & L. Li</i>	
Heat Transfer Characteristics of the Wickless Jacket-Type Radial Heat Pipe	751
<i>Y. Jiao, G. Xia, & S. Huang</i>	
Natural Convection Heat Transfer in a Differentially Heated Enclosure with Adiabatic Partitions and Filled with a Bingham Fluid	765
<i>K. Ragui, Y.K. Benkahla, N. Labsi, & A. Boutra</i>	

Number 9

Numerical Simulation of Processes Occurring in a Steam–Water Mixing Heater	785
<i>Xingfang Zhang, J. Zhang, Xinghui Zhang, S. Wu, J. Liu, & Xiujuan Zhang</i>	
Numerical Study of the Hydrothermal Behavior and Exergy Destruction of Magnetic Nanofluid in Curved Rectangular Microchannels	795
<i>M. Mohammadpourfard, S.A. Zonouzi, & F. Mohseni</i>	
Numerical Study of Heat Transfer Enhancement and Flow Characteristics of Three-Dimensional Plate Fin Heat Exchangers	819
<i>E. Buyruk & K. Karabulut</i>	
Natural Convection Heat Transfer Inside an Inclined Solar Collector with a V-Corrugated Absorber	839
<i>M. Habibi Matin, R. Hosseini, & H. Naderan</i>	
Ultrafast Laser Pulse Train Radiation Transfer in a Scattering-Absorbing 3D Medium with an Inhomogeneity	861
<i>M. Akamatsu & Z. Guo</i>	

Number 10

Numerical Investigation of Species Distribution and the Anode Transfer Coefficient Effect on the Proton Exchange Membrane Fuel Cell (PEMFC) Performance	881
<i>N. Ahmadi, V. Ahmadpour, & S. Reza zadeh</i>	
CFD Method Study of the Influence of Pulsating Frequency on Enhancement of Heat Transfer from a Rectangular Flat Plate in Laminar Pulsating Flows inside a Vertical Circular Channel	903
<i>G. Li, Y. Zheng, G. Hu, & Zh. Zhang</i>	
Prediction of the Rate of Moisture Evaporation from Jaggery in Greenhouse Drying using the Fuzzy Logic	923
<i>O. Prakash, A. Kumar, A.K. Kaviti, & P.V. Kumar</i>	
Study of Droplet Heat and Mass Transfer in Forced Convection Turbulence Fluctuations using the Volume-of-Fluid Model	937
<i>P. Zhao & G. Li</i>	
Coupled Simulation of Multiphase Flow and Heat Transfer in a Jacketed Vessel	955
<i>M.L. Liu, Y. Mao, J.Y. Wang, & J. Wang</i>	

Number 11

Numerical Analysis of Heat Exchange in a Porous Channel with Heat Generation and Local Thermal Nonequilibrium	969
<i>A. Abdedou, K. Bouhadef, & F. Topin</i>	
Simulation Studies of Multimode Heat Transfer from a Discretely Heated Vertical Channel	995
<i>S.D. Londhe & C. Gururaja Rao</i>	
Conjugate Heat Transfer with Variable Fluid Properties in a Heated Horizontal Annulus	1019
<i>S. Touahri & T. Boufendi</i>	
An Assessment of Turbulence Models for Predicting Conjugate Heat Transfer for a Turbine Vane with Internal Cooling Channels	1039
<i>S. Zheng, Y. Song, G. Xie, & B. Sundén</i>	

Number 12

Experimental Research on Coupled Heat Transfer of a Heat Source Encapsulated into a Subatmospheric Hypobaric Chamber	1065
<i>H. Wang, C. Sun, & X-L. Xia</i>	
Flow over a Porous Structure in a Square Cavity: Effects of the Porous Structure Size and Porosity on the Heat Transfer Performance and Fluid Pressure Loss	1081
<i>S.Z. Shuja, B.S. Yilbas, & S.M.A. Khan</i>	
Heat Transfer Enhancement of MHD Flow by a Row of Magnetic Obstacles	1101
<i>X. Zhang & H. Huang</i>	
The Effect of Blockage Ratio on Heat Transfer and Entropy Generation in Pulsating Flow through Parallel Bluff Plates	1123
<i>M. Rahimi, A.A. Ranjbar, & M.J. Hosseini</i>	
Squeezing Flow with Second-Order Velocity and Thermal Slip Conditions	1147
<i>T. Hayat, A. Qayyum, & A. Alsaedi</i>	

HEAT TRANSFER RESEARCH

 tube bank, 563
 turbulence model, 1039
 turbulent flow, 63, 785
 turbulent fluctuations, 937
 two-phase flow model, 483
 two-stage dehumidification, 383
 unsteady flow, 1123
 vapor compression, 483
 variable property, 1065
 V-corrugated absorber, 839
 vehicle engine, 271
 velocity slip, 1147
 vertical-borehole, 417
 vertical channel, 995
 viscous dissipation, 689
 voltage, 881
 vortex shedding, 1101
 wall slip, 713
 water, 123
 water outlet temperature, 293
