

## HEAT TRANSFER RESEARCH

---

**Volume 37**

---

**Volume 37 Number 1, 2006**

- 1 A General Lumped Model for Unsteady Heat Conduction of an Asymmetric Cylinder and Unsteady Couette Flow  
*Vahid Ebrahimián and D. D. Ganji*
- 21 Opposing Flow Turbulent Mixed-Convection Heat Transfer in a Vertical Flat Channel with One-Sided Heating  
*Robertas Pořkas, Povilas Pořkas, and Jokūbas Kolesnikovas*
- 35 Experimental Investigation of Opposing Turbulent Mixed-Convection Heat Transfer in an Inclined Flat Channel with One-Sided Heating.  
1. Method and Investigations for an Inclination Angle  $\varphi = 60^\circ$   
*Robertas Pořkas, Stasys Šinkunas, and Povilas Pořkas*
- 45 Concerning Certain Characteristic Features of Heat and Mass Transfer on Permeable Surfaces  
*E. P. Volchkov*
- 65 Characteristic Features of Heat Transfer in Flow of a Rarified Gas Past a Cylinder on Interference of an Oblique Shock with a Leading Shock Wave  
*V. N. Gusev and A. I. Erofeev*
- 77 Experimental Investigation of a Diffusion Thermoeffect in a Boundary Layer during Helium Injection into Air  
*E. P. Volchkov, V. P. Lebedev, and V. V. Lukashov*
- 85 Modeling of a Flow in a Channel with a Heated Barrier Having Rectangular Section on the Wall  
*A. Ya. Gorbachevskii, Ya. K. Lokhanskii, A. G. Churbanov, Z. Chara, and B. Horjeni*

**Volume 37 Number 2, 2006**

- 93 Influence of Nonisothermicity on the Heat Transfer from a Bank of Finned Tubes in the Presence of Coating on the Outside Surface  
*V. G. Gorobets*
- 103 Heat Transfer and Aerodynamic Drag of Banks of Smooth Tubes with Surfaces of Different Geometries in a Crossflow  
*V. T. Buglaev, A. A. Anisin, and A. K. Anisin*
- 113 Simulation of the System Stabilizing Film Cooling of Turbine Blades Based on Blank Damping Cavities  
*N. N. Kovalnogov and D. A. Buinov*
- 123 The Results of Experimental Investigation into Rational Intensification of Convective Heat Transfer in Rectangular Channels with Protrusions and Grooves Having a Smoothly Rounded Two-Dimensional Cross Section  
*V. Ya. Vasiliev*
- 135 Study of the Thermal Resonance in Multidimensional Irregular Thermal Fields that is Initiated by the Nonlinear Boundary Conditions  
*A. V. Kotovich and G. A. Nesenenko*
- 149 Quasistatic Thermoelastic Fields in a Half-Space Heated by a Circular Surface Heat Source  
*V. A. Pinsker*
- 165 Investigation of Processes in Melting Accumulators with a Heat-Conducting Packing and Development of Computational Methods for Their Optimization  
*E. A. Lesyuk*
- 175 Improving Technological Effectiveness of Computational Techniques of the Applied Thermomechanics by Their Computerization  
*Yu. S. Postolnik, I. A. Pavlyuchenkov, and N. V. Andrianov*
- 183 Analytical Solution of the Problem of Heat Conduction of a Semi-Bounded Body with an Envelope and Its Application to Control and Identification of Heat Transfer Processes  
*N. M. Lazuchenkov and D. N. Lazuchenkov*

**Volume 36 Number 3, 2006**

- 189 Study of Radiative and Conductive Heat Transfer by the Inverse Problem Method  
*A. V. Nenarokomov, O. M. Alifanov, and D. M. Titov*
- 199 Development of an Improved Mode of Heat Transfer of a Hydrocarbon Heat Carrier under a Supercritical Pressure in an External Acoustic Field of a Standing Wave Formed by Thermoacoustic Self-Oscillations of Pressure  
*Ch. M. Verdiev and D. Ch. Verdiev*

- 211 Hydrodynamics and Heat Transfer in Slit Gaskets with Magnetic Seals  
*A. N. Vislovich and A. S. Dmitrichenko*
- 221 Models and Methods of Semi-Infinite Optimization Inverse Heat-Conduction Problems  
*E. Ya. Rapoport and Yu. E. Pleshivtseva*
- 233 Axisymmetrical Problem of Accumulation of Heat Based on Phase Transition  
*I. I. Rozhin*
- 247 Experimental Investigation of Heat Transfer along the Length of a Horizontal Tube during Liquid Metal Heat-Carrier Flow in a Transverse Magnetic Field  
*L. G. Genin, V. G. Zhilin, Yu. P. Ivochkin, Ya. I. Listratov, N. G. Razuvanov, R. A. Sarvin, and V. G. Sviridov*
- 259 Heat Exchangers with Flow Swirling by Twisted Tubes and Estimation of Their Thermohydraulic Efficiency  
*B. V. Dzyubenko, G. A. Dreitser, and A. I. Yakimenko*
- 271 Investigation of the Frequency Spectra of Pulsations in a Gas Tube Flow under Unsteady Conditions  
*G. A. Dreitser and V. M. Kraev*

**Volume 37 Number 4, 2006**

- 279 Numerical Simulation of Twisted Flows in the Channel of a Chimney Stack  
*P. V. Roslyakov, I. A. Zakirov, I. L. Ionkin, and L. E. Egorova*
- 295 Generalization of the Existing Collection of Experimental Information on Critical Heat Loads in Flow Twisting  
*Yu. A. Kuzma-Kichta and V. V. Glazkov*
- 307 Calculation of the Hydrodynamics of Multiphase Heterogeneous Media in a Centrifugal Field  
*L. P. Kholpanov and R. I. Ibyatov*
- 321 Problems of Vortex Dynamics in the Thermal Physics of Power Plants  
*O. V. Mitrofanova*
- 349 Estimation of the Thermohydraulic Efficiency of Heat Exchanging Apparatuses with Twisted Tubes  
*B. V. Dzyubenko*
- 365 A Small-Size Cylindrical Steam Hot-Water Boiler with Twisting of a Heat Carrier and Turbo-Supercharging for a Steam-Gas Thermoelectric Mini Plant  
*K. A. Yakimovich, Yu. K. Yakimovich, and Yu. G. Zlodeev*

**Volume 37 Number 5, 2006**

- 375 Intensification of Heat Transfer in Systems of Gas Impact Jets

*A. V. Zaitsev and B. P. Zhilkin*

- 383 Heat Transfer in a Transverse Extended Cavity with Inclined Walls  
in a Turbulized Flow  
*A. Yu. D'yachenko, V. I. Terekhov, and N. I. Yarygina*
- 395 Natural Convection Heat Transfer in a Rotating Enclosure with Three Rows  
of Discrete Heat Sources  
*L. F. Jin, C. P. Tso, and K. W. Tou*
- 407 Use of Asymptotic Methods in Studying the Temperature Field  
in the Operating Well  
*A. I. Filippov, P. N. Mikhailov, and K. A. Filippov*
- 421 Modeling and Computation of Heat Transfer in a System  
"Body–Multilayer Coating"  
*V. A. Shevchuk*
- 435 Development of the Methods of Combinatorial Thermal Modeling  
on the Basis of Object-Oriented Programming  
*V. S. Khokhulin, A. A. Balashov, D. M. Titov, and I. A. Selyanova*
- 447 Conditions of the Existence of the Optimum Thickness of a Screened Wall  
Exposed to Local Pulse-Periodic Heating  
*E. S. Tverskaya*
- 459 Thermal Interaction of Straight-Through and Twisted Gas Jets  
with a Crossflow  
*B. I. Zyskin, S. S. Skachkova, K. V. Zaitsev, B. V. Berg, T. F. Bogatova,  
and B. P. Zhilkin*

**Volume 37 Number 6, 2006**

- 467 Mechanisms of the Self-Organization of Tornado-Like Jets Flowing Past  
Three-Dimensional Concave Reliefs  
*G. I. Kiknadze, I. A. Gachechiladze, V. G. Oleinikov, and V. V. Alekseev*
- 495 Use of Twisted Air Flows to Increase the Thermal Efficiency  
of a Chimney-Type Evaporative Cooling Towers of Steam  
and Atomic Power Plants  
*A. V. Vlasov, V. F. Davidenko, G. V. Dashkov, A. D. Solodukhin,  
N. N. Stolovich, and V. D. Tyutyuma*
- 501 Computational-Experimental Investigation of Flow in the Sprayer Module  
of a Combustion Chamber of TAPS Circuit Design  
*S. Yu. Krashennnikov, A. K. Mironov, and V. V. Tretiyakov*
- 515 Numerical Simulation of a Turbulent Diffusion Combustion with a Small  
Vorticity Parameter with the Aid of FLUENT CFD Package  
*D. A. Lysenko and A. A. Solomatnikov*

- 527 Effect of the Direction of Coolant Supply to Holes on the Vortical Structures Formed in Screen Cooling  
*S. V. Veretennikov*
- 541 Heat Transfer Intensification in Steam-Generating Rod Fuel Assemblies with the Aid of Local Swirlers of a Coolant Flow  
*V. N. Smolin*
- 551 Heat Transfer during Flow Twisting in a Channel of Square Cross Section  
*Yu. I. Shanin*
- 561 Numerical Investigation of the Hydrodynamics and Heat Transfer in a Tube with a Spiral Tape  
*A. M. Erokhina, A. T. Komov, and Yu. N. Tokarev*

**Volume 37 Number 7, 2006**

- 571 Control of Free Convection Passage Across Square Cavities with Heated/ Cooled Vertical Sidewalls by Manipulating "on" and "off" Deflectors  
*Antonio Campo and El Hassan Ridouane*
- 593 Numerical Simulation of Vortical Heat Transfer in Tube Banks  
*S. A. Isaev, P. A. Baranov, T. A. Baranova, and N. A. Kudryavtsev*
- 607 Numerical Computation of the Temperature Evolution in the Human Eye  
*El Hassan Ridouane and Antonio Campo*
- 619 Predictive Control Based on the Third Order Laguerre — Volterra Model: Application to Regulate a Humidifying Process  
*T. Garna, A. Mbarek, and H. Messaoud*

**Volume 37 Number 8, 2006**

- 651 Simulation of Limiting Heat Transfer under Combined Intensification of Heat Transfer by Circular Vortex Generators and Tape Swirlers  
*G. A. Dreitser and I. E. Lobanov*
- 663 Experimental Study of Heat and Mass Transfer in a Swirling Gas Flow  
*A. A. Yudakov and O. N. Tsybul'skaya*
- 675 Simulation of Flow Structure in the Suction Pipe of a Hydroturbine by Integral Characteristics  
*P. A. Kuibin, V. L. Okulov, and I. M. Pylev*
- 685 Investigation of a Vortex Combustion Chamber with a Centrifugal Fluidized Bed  
*V. V. Lukashov and A. V. Mostovoi*
- 691 Influence of Secondary Vortices of Thermogravitational Convection on the Liquid Metal Heat Exchange in a Horizontal Tube in a Magnetic Field

*L. G. Genin, Ya. I. Listratov, N. G. Razuvanov, S. A. Ryzhkov,  
and V. G. Sviridov*

- 707 Vortex Effects: Theory, Experiment, Industrial Application, Prospects  
*Sh. A. Piralishvili and A. I. Azarov*
- 731 Mechanisms Leading to Tornado Generation and Sustainment  
*O. A. Sinkevich*
- 755 Author Index, Vol. 37
- 757 Tables of Contents, Vol. 37
