

## SUBJECT INDEX - Volume 27

*Critical Reviews<sup>TM</sup> in Immunology*

Page Numbers for Issues:

**Issue 1**, 1–95; **Issue 2**, 97–218; **Issue 3**, 221–288; **Issue 4**, 291–397; **Issue 5**, 401–493; **Issue 6**, 495–572

- $\alpha$ -GalCer, 511  
A1, 495  
A2B, 495  
acetylcholine receptor, 271  
activation-induced cytidine deaminase (AID), 367  
ADA1, 495  
ADA2, 495  
adenosine receptors, 495  
ADGF, 495  
adoptive transfer, 527  
angiogenesis, 401  
antibodies, 271, 319  
antibody-mediated rejection, 153  
antigen presentation, 47, 271  
antigen processing, 485  
antigen recognition, 247  
antigenic regions, 319  
Anti-Jo-1, 559  
antimicrobials, 233  
Anti-PL-12, 559  
Anti-PL-7, 559  
antiviral, 291  
AP-1, 539  
apoptosis, 15, 547  
apoptotic cells, 357  
arthritis, 345  
autoantibody, 221, 559  
autoimmune disease, 61, 221, 271  
autoimmune, 291  
autoimmunity, 33, 345
- B cell, 367  
B lymphocyte, 47  
binding regions, 319  
botulinum neurotoxin, 303, 319  
botulism, 303
- C. neoformans*, 547  
cancer immunotherapy, 463  
cancer, 61, 511, 527  
capsule, 547  
carbohydrate antigens, 153  
CD134, 415  
CD134L, 415  
CD1d, 511
- CD26, 495  
CD8+ T lymphocytes, 485  
cell-mediated immunity, 141  
chimera, 233  
chronic prostatitis, 33  
class switch DNA recombination (CSR), 367  
clinical study, 511  
clinical trials, 463  
coagulation, 153  
collagen, 345  
costimulation, 167, 357, 415, 451  
CTLA-4, 61  
cytokine, 61, 401
- dendritic cells, 357, 463  
dendritic-tumor fusion hybrids, 463  
dietary supplementation, 97
- electrofusion, 463  
enhanceosome, 367
- fertility, 33  
Foxp3, 61  
fragment C, 303  
functional genomics, 437
- GATA3, 539  
germinal center reaction, 367  
glucuronoxylomannan, 547  
GPCR, 495  
GXM, 547
- H chain, 319  
homeostasis, 15  
HSP90, 485  
human herpes virus type 8, 401  
human immunodeficiency virus, 401
- idiopathic inflammatory myopathy, 559  
IgE, 15  
IL-10, 15  
IL-4, 15  
immune function, 97  
immune response, 547  
immunoglobulin (Ig), 141, 367

- immunomodulation, 221  
immunotherapy, 271, 401, 437, 451, 511  
interleukin-2, 437
- JunB, 539
- Kaposi's sarcoma–associated herpes virus, 401
- mast cell, 15  
melanoma, 437  
memory, 47  
MHC, 47, 271  
microarray, 437  
microbiota, 97  
multiple sclerosis, 1  
myasthenia gravis, 271  
myelin, 291
- natural antibody, 221  
neurological, 291  
neuroprotection, 1  
neurotoxin, 291  
neurotrophic factors, 1  
NFAT, 539  
NF $\kappa$ B, 539  
nicotinic, 291  
NKT cells, 511
- oligosaccharide, 97
- pathogenic consequences, 33  
pathogens, 233  
pattern recognition receptors, 547  
pentavalent botulinum toxoid, 303  
peptide mimics, 247  
peptides, 345  
plasmacytoid differentiation, 367  
polysaccharide, 97, 547  
polyspecificity, 247  
posttranslational modifications, 367
- prebiotic, 97  
proteasome, 485  
protective autoimmunity, 1  
PRR, 547
- receptor, 167, 291  
recombinant subunit vaccine, 303  
regulation, 167, 221  
regulatory T cells, 61  
rejection, 167  
renal cell cancer, 437  
repertoire, 141
- SCID, 495  
semen quality, 33  
signal transduction pathways, 367  
somatic hypermutation (SHM), 367  
STAT6, 539  
synaptosomes, 319  
synthetic peptides, 271, 319
- T cell, 167, 345  
T-cell receptor, 141, 221  
TCM, 527  
TCR, 61  
TEM, 527  
TGF, 15  
thymus, 61, 167  
TNFR superfamily, 415  
tolerance, 357  
toxins, 233  
transcription factors, 367  
transplantation, 61  
tumor antigens, 451  
tumor immunology, 415  
tumor-associated antigens, 463
- vaccine, 451, 527  
vascular rejection, 153  
viral, 527
