

TABLE OF CONTENTS FOR VOLUME 20

ATOMIZATION AND SPRAYS

PAGE RANGE OF ISSUES

Issue 1: 1–92; Issue 2: 93–175; Issue 3: 177–268; Issue 4: 269–364; Issue 5: 365–465, Issue 6: 467–564;
Issue 7: 565–652; Issue 8: 653–747 ; Issue 9: 749–835; Issue 10: 837–922;
Issue 11: 923–1016; Issue 12: 1017–1099

Number 1

Computational Fluid Dynamics Analysis of the Electrostatic Spray Painting Process with a Rotating Bell Cup	1
<i>V. Viti, J. Kulkarni, and A. Watve</i>	
Introduction to Ringlike Structures Observed in High-Pressure Diesel Injection Into Liquid Bath: Preliminary Investigation	19
<i>M. Weclas and J. Cypris</i>	
Droplet-Particle Collisions in Intersecting Melt Sprays	31
<i>U. Gao and R. Fritsching</i>	
Effect of Recess on Mixing and Atomization Characteristics of Liquid-Liquid Swirl Coaxial Injectors	41
<i>D. Kim, S. Kim, P. Han, and Y. Yoon</i>	
Experimental Investigation of the Correlation between Nozzle Flow and Spray Using Laser Doppler Velocimeter, Phase Doppler System, High-Speed Photography, and X-Ray Radiography	57
<i>B. Balewski, B. Heine, and C. Tropea</i>	
Modeling Subgrid-Scale Mixing of Vapor in Diesel Sprays Using Jet Theory	71
<i>N. Abani and R. D. Reitz</i>	
A Comparison of Spray Angle Measurements Using Optical and Mechanical Methods	85
<i>Y. R. Sivathanu, J. Lim, B. Wallace, and R. Seei</i>	

Number 2

Large Eddy Simulation of Droplet Stokes Number Effects on Turbulent Spray Shape	93
<i>V. Vuorinen, H. Hillamo, O. Kaario, M. Larmi, and L. Fuchs</i>	
A FEM Solver Coupled to a Multilevel VOF Method for Simulation of Axisymmetric Jets and to a Front-Tracking Method for Simulation of Spreading Droplets	115
<i>A. Cervone, S. Manservigi, and R. Scardovelli</i>	
Multiple Scattering Suppression in Planar Laser Imaging of Dense Sprays by Means of Structured Illumination	133
<i>E. Berrocal, E. Kristensson, M. Richter, M. Linne, and M. Aldén</i>	
Drop-Size Measurement Techniques Applied to Gasoline Sprays	141
<i>N. Fdida, J.-B. Blaisot, A. Floch, and D. Dechaume</i>	
Effect of Ambient Temperature and Density on Shock Wave Generation in a Diesel Engine	163
<i>S. Kook and L. M. Pickett</i>	

Number 3

Diesel Spray Visualization and Shockwaves	177
<i>H. Hillamo, T. Sarjoavaara, O. Kaario, V. Vuorinen, and M. Larmi</i>	
A Parametric Numerical Study of the Head-On Collision Behavior of Droplets	191
<i>G. Strotos, N. Nikolopoulos, and K.-S. P. Nikas</i>	

Effect of Bubble Generation Characteristics on Effervescent Atomization at Low Gas-Liquid Ratio Operation	211
<i>S. Ghaemi, P. Rahimi, and D. S. Nobes</i>	
Controlling Droplet-Size Distribution Using Oil Emulsions in Agricultural Sprays	227
<i>K. Qin, H. Tank, S. Wilson, B. Downer, and L. Liu</i>	
Computed and Measured Fuel Vapor Distribution in a Diesel Spray	241
<i>J. Abraham and L. M. Pickett</i>	
Modeling Collision Outcome in Moderately Dense Sprays	251
<i>G. Luret, T. Menard, A. Berlemont, J. Reveillon, F.-X. Demoulin, and G. Blokkeel</i>	

Number 4

Electrical and Spray Characteristics of a Multiorifice Charge-Injection Atomizer for Electrically Insulating Liquids	269
<i>A. Kourmatzis, J. Allen, and J. S. Shrimpton</i>	
DNS Calculations for the Modeling of Real Industrial Applications	281
<i>H. Gomaa, N. Roth, J. Schlotke, and B. Weigand</i>	
Splashing Phenomena during Liquid Droplet Impact	297
<i>J. Liu, H. Vu, S. S. Yoon, R. Jepsen, and G. Aguilar</i>	
Detailed Numerical Investigation of Turbulent Atomization of Liquid Jets	301
<i>O. Desjardins and H. Pitsch</i>	
Nanosecond Structured Laser Illumination Planar Imaging for Single-Shot Imaging of Dense Sprays	327
<i>E. Kristensson, E. Berrocal, M. Richter, and M. Aldén</i>	
Combined Spray Model for Gasoline Direct Injection Hollow-Cone Sprays	335
<i>P. Pischke, D. Martin, and R. Kneer</i>	

Number 5

Spray Characterization Based on the Pearson System of Frequency Curves	365
<i>R. Pimentel, R. Stowe, P. Harris, A. DeChamplain, and D. Kretschmer</i>	
Multiphase Spray Cooling of Steel Plates near the Leidenfrost Temperature – Experimental Studies and Numerical Modeling	387
<i>N. Sozbir, C. Yigit, R. J. Issa, S. C. Yao, H. R. Güven, and S. Ozcelebi</i>	
Numerical Analysis of Ballistic Imaging for Revealing Liquid Breakup in Dense Sprays	407
<i>D. Sedarsky, E. Berrocal, and M. Linne</i>	
Aerosol Characterization of Concentric Pneumatic Nebulizer Used in Inductively Coupled Plasma – Mass Spectrometry (ICP-MS)	415
<i>A. Kashani and J. Mostaghimi</i>	
Large Eddy Simulation of Droplet Stokes Number Effects on Mixture Quality in Fuel Sprays	435
<i>V. Vuorinen, H. Hillamo, O. Kaario, M. Nuutinen, M. Larmi, and L. Fuchs</i>	
Diesel Spray Behavior at Compression Ratios Up To 100:1	453
<i>M. N. Svrcek, S. L. Miller, and C. F. Edwards</i>	

Number 6

Analysis of a Two-Fluid Sprayer and Its Use to Develop the Number Size Distribution Moments Spray Model, Part I: Experimental Analysis	467
<i>N. G. Emekwuru and A. P. Watkins</i>	

Review of Atomization: Current Knowledge and Future Requirements for Propulsion Combustors	485
<i>M. A. Benjamin, R. J. Jensen, and M. Arienti</i>	
Cavitation in Nozzles of Plain Orifice Atomizers with Various Length-To-Diameter Ratios	513
<i>A. Sou, S. Hosokawa, and A. Tomiyama</i>	
Effervescent Atomization for Industrial Energy - Technology Review	525
<i>D. Konstantinov, R. Marsh, P. Bowen, and A. Crayford</i>	
Experimental Approaches to Investigating Liquefied LPG Spray Characteristics	553
<i>K.-B. Kim, Y.-J. Kim, K.-H. Lee, and K.-S. Lee</i>	

Number 7

Single-Phase Aerodynamic Flowfield Validation of Novel Airblast Atomizer Designs	565
<i>M. Burby, G. G. Nasr, A. Yule, and L. Morgan</i>	
n-Heptane Droplet Vaporization using Molecular Dynamics	581
<i>B. A. Petrilla, M. F. Trujillo, and M. M. Micci</i>	
Real Gas Effects in Mixing-Limited Diesel Spray Vaporization Models	595
<i>C. C. M. Luijten and C. Kurvers</i>	
A Review of Pharmaceutical Tablet Spray Coating	611
<i>A. R. Muliadi and P. E. Sojka</i>	
Spray Characteristics of an Air-Driven Rotary Atomizer with a Double-Layer Cup for Use in an Industrial Oil Burner	639
<i>J. Lee, Y. Choi, S. Yoon, and D. Cho</i>	

Number 8

Analysis of a Two-Fluid Sprayer and Its Use to Develop the Number Size Distribution Moments Spray Model, Part II: Computational Analysis	653
<i>N.G. Emekwuru and A.P. Watkins</i>	
A Large-Eddy Simulation Study of Sub-Grid Two-Phase Interaction in Particle-Laden Flows and Diesel Engine Sprays	673
<i>N. Bharadwaj and C.J. Rutland</i>	
Viscoelastic Air-Blast Sprays in a Cross-Flow, Part 1: Penetration and Dispersion	697
<i>L.K.B. Li, S.I. Green, M.H. Davy, and D.T. Eadie</i>	
Viscoelastic Air-Blast Sprays in a Cross-Flow, Part 2: Droplet Velocities	721
<i>L.K.B. Li, S.I. Green, M.H. Davy, and D.T. Eadie</i>	
Modeling of the Processes in Diesel Engine-Like Conditions: Effects of Fuel Heating and Evaporation	737
<i>W.A. Abdelghaffar, A.E. Elwardany, and S.S. Sazhin</i>	

Number 9

Effects of Canted Injection Angles on the Spray Characteristics of Liquid Jets in Subsonic Crossflows	749
<i>M.-K. Kim, J. Song, J. Hwang, and Y. Yoon</i>	
Tailoring Dry Powder Inhaler Performance by Modifying Carrier Surface Topography by Spray Drying	763
<i>S.G. Maas, G. Schaldach, P.E. Walzel, and N.A. Urbanetz</i>	
Placement and Acceleration of Liquid Jets in Pressurized Cross-Flows	775
<i>A. Bellofiore, A. Cavaliere, and R. Ragucci</i>	

Effect of Dispersed Water Droplet Size in Microexplosion Phenomenon for Water in Oil Emulsion	791
<i>E. Mura, C. Josset, K. Loubar, G. Huchet, and J. Bellettre</i>	
Experimental Investigation of the Phenomenon of Oil Breakup in an Engine Crankcase	801
<i>S.M. Begg, G. de Sercey, N.D.D. Miché, M.R. Heikal, R. Gilchrist, Y. Noda, T. Tsuruoka, and Y. Mamiya</i>	
Spray Characteristics of a Flow-Blurring Atomizer	821
<i>B.M. Simmons and A.K. Agrawal</i>	

Number 10

Chaotic Disintegration of a Liquid Wall Film: A Model of an Air-Blast Atomization	837
<i>I.V. Roisman, F.Z. Batarseh, and Tropea</i>	
Disintegration Process of an Annular Liquid Sheet Assisted by Coaxial Gaseous Coflow(s)	847
<i>N. Leboucher, F. Roger, and J.-L. Carreau</i>	
Spray Behavior of the Rotary Atomizer with In-Line Injection Orifices	863
<i>S.M. Choi and S.H. Jang</i>	
Effect of Cavitation in Circular Nozzle and Elliptical Nozzles on the Spray Characteristic	877
<i>J.G. Hong, K.W. Ku, S.R. Kim, and C.W. Lee</i>	
Characterization of a Spray Generated by an Airblast Atomizer with Prefilmer	887
<i>F.Z. Batarseh, I.V. Roisman, and C. Tropea</i>	
Transition from Heterogeneous to Homogenous Nucleation in a Simple Structure	
Flash-Boiling Atomizer	905
<i>M. Levy and E. Sher</i>	
Experimental Investigation of a Single Droplet Impact onto a Sessile Drop	907
<i>N. Nikolopoulos, G. Strotos, K.S. Nikas, M. Gavaises, A. Theodorakakos, M. Marengo, and G.E. Cossali</i>	

Number 11

Influence of Viscosity on Droplet Size Distribution and Generation Rate in Ultrasonic Atomization	923
<i>A. Lozano, J.A. Garcia, J.L. Navarro, E. Calvo, and F. Barreras</i>	
Single Droplet Impacts onto Deposited Drops. Numerical Analysis and Comparison	935
<i>N. Nikolopoulos, G. Strotos, K.S. Nikas, A. Theodorakakos, M. Gavaises, M. Marengo, and G.E. Cossali</i>	
Water Spray Characterization of a Coaxial Air-Assisted Swirling Atomizer at Sonic Conditions	955
<i>M. Marklund and F. Engstrom</i>	
Development of a Realistic Multicomponent Fuel Evaporation Model	965
<i>S. Yang, Y. Ra, R.D. Reitz, B. VanDerWege, and J. Yi</i>	
Influence of Gas Velocity on Breakup of Planar Liquid Sheets Sandwiched Between Two Gas Streams	983
<i>S. Nath, A. Mukhopadhyay, A. Datta, S. Sen, and T.J. Tharakan</i>	
A Three-Stage Freezing Model for Liquid Droplets with Applications to Food Sprays	1005
<i>F. X. Tanner, K. A. Feigl, and E. J. Windhab</i>	

Number 12

A Maximum Entropy Approach to Modeling the Dynamics of a Vaporizing Spray	1017
<i>M.R. Archambault</i>	
Effect of Nozzle Geometry on the Atomization and Spray Characteristics of Gelled-Propellant Stimulants Formed by Two Impinging Jets	1033
<i>S. Fakhri, J.G. Lee, and R.A. Yetter</i>	

Spray Diffusion Flames—An Asymptotic Theory	1047
<i>S. Lerman and J.B. Greenberg</i>	
Experimental Investigation of Near Nozzle Spray Structure and Velocity for a GDI Hollow Cone Spray	1065
<i>D. Martin, M. Cardenas, P. Pischke, and R. Kneer</i>	
Pressure—Swirl Atomization of Water-in-Oil Emulsions	1077
<i>C. D. Bolszo, A. A. Narvaez, V. G. McDonell, D. Dunn-Rankin, and W. A. Sirignano</i>	
INDEX to Volume 20	1101
