**TABLE OF CONTENTS**

<b>Formation, Passivation, and Reactivity of Energetic Nanopowders (Invited Paper)</b> J. A. Puszynski	<b>1</b>
<b>Nanotechnology Energetic Material Dynamics Studied with Nanometer Spatial Resolution and Picosecond Temporal Resolution (Invited Paper)</b> D. D. Dlott, S. A. Hambir, and H. Yu	<b>21</b>
<b>Energetic Systems and Nanotechnology – A Look Ahead</b> R. Kavetsky, D. K. Anand, J. Goldwasser, H. Bruck, R. Doherty, and R. Armstrong	<b>39</b>
<b>Influence of Submicron Particles on the Properties of Energetic Formulations</b> J. Akester, P. Braithwaite, and S. Nicolich	<b>49</b>
<b>Nano- and Micrometer-Scale Aluminum Powder Oxidation in Carbon Dioxide</b> K. Brandstadt, D. Frost, and J. A. Kozinski	<b>59</b>
<b>Production of Nanocrystalline RDX by Rapid Expansion of Supercritical Solutions</b> V. Stepanov, I. B. Elkina, T. Matsunaga, A. V. Chernyshev, E. N. Chesnokov, X. Zhang, N. L. Lavrik, and L. N. Krasnoperov	<b>75</b>
<b>Size-Resolved Measurements and Theory of Aluminum Nanoparticle Oxidation Kinetics</b> A. Rai, K. Park, D. G. Lee, and M. R. Zachariah	<b>89</b>
<b>Radiative Properties of Nano-Energetic Materials</b> M. Q. Brewster and S. M. Begley	<b>105</b>
<b>Universal Law of the Spatial-Periodic Nano- and Micro-Structures Excitation During the Transient Combustion of Energetic Materials</b> A. N. Lukin	<b>119</b>

*International Journal of  
Energetic Materials and  
Chemical Propulsion*

Volume 6 / Issue 2, 2007

TABLE OF CONTENTS

<b>Agglomeration and Ignition of Aluminum Particles Coated by Nickel</b> <i>V. Rosenband and A. Gany</i>	<b>143</b>
<b>Modified Burning Rate Spectrum &amp; Combustion Mechanism of Tetra-ol GAP</b> <i>S. Togo, K. Kobayashi, T. Shimada, Y. Niimi, Y. Seike, M. Nishioka, and K. Hori</i>	<b>153</b>
<b>Why and How Type of Passivation Layer Affects the Properties of Aluminum Nanopowders for Energetic Applications</b> <i>A. Gromov, U. Förter-Barth, and U. Teipel</i>	<b>171</b>
<b>Future Chemical Propellants for Space, Defense, and Commercial Applications (Invited Paper)</b> <i>C. Perut</i>	<b>181</b>
<b>Examination of AP/KN Composite Propellant Thermal Wave Structure Under Steady-State Burning</b> <i>V. S. Bozic, M. V. Milos, D. D. Blagojevic, and B. S. Jankovski</i>	<b>197</b>
<b>Physical and Chemical Processes Governing the Combustion of Binary Compositions of Ammonium Dinitramide with Glycidylazidepolymer</b> <i>V. P. Sinditskii, V. Y. Egorshev, A. I. Levshenkov, and M. V. Berezin</i>	<b>213</b>
<b>The Role of Additives in Combustion Mechanism of Ammonium Nitrate</b> <i>V. P. Sinditskii, V. Y. Egorshev, A. I. Levshenkov, and V. V. Serushkin</i>	<b>229</b>
<b>Decomposition and performance of new high Nitrogen propellants and explosives</b> <i>Bryce C. Tappan*, Steven F. Son, Arif N. Ali, David E. Chavez, and Michael A. Hiskey</i>	<b>255</b>

*International Journal of  
Energetic Materials and  
Chemical Propulsion*

*Volume 6 / Issue 3, 2007*

**TABLE OF CONTENTS**

<b>French and German Test Methods to Characterize Low Sensitive Gun Propellants</b> <i>B. Baschung, D. Grune, G. Pauly, C. Reynaud, and S. Schaefer</i>	<b>269</b>
<b>Synthesis and Characterization of a Hydroxy Terminated Polyether (HTPE) Copolymer for Use as a Binder in Composite Rocket Propellants</b> <i>R. I. Caro, J. M. Bellerby, and E. Kronfli</i>	<b>289</b>
<b>Preparation and Characterization of Gelled Fuels</b> <i>R. Brändle, J. Liebl, and R. Pein</i>	<b>307</b>
<b>Mitigating the Shaped Charge Jet Impact Threat in Main Charge Fill Ammunition</b> <i>J. Niles, S. Nicolich, D. Doll, and N. Rasmussen</i>	<b>323</b>
<b>Dual Advantages of Ultra Fine Crystal-sized Energetic/Reactive Material Formulations</b> <i>R. W. Armstrong</i>	<b>335</b>
<b>Characterization and Applications of FOX-7</b> <i>A.E.D.M. van der Heijden, C. Eldsäter, W.P.C. de Klerk, and A. Kjellström</i>	<b>347</b>
<b>Low Temperature Coefficient (LTC) Propellants</b> <i>D. Mueller and W. Langlotz</i>	<b>369</b>
<b>Feasibility Studies for Development of an Alternate Test Protocol to the Full-Scale External Fire Test Used in Hazards Classification</b> <i>A. I. Atwood, M. K. Rattanapote, P. O. Curran, and A. G. Butcher</i>	<b>377</b>

*International Journal of  
Energetic Materials and  
Chemical Propulsion*

Volume 6 / Issue 4, 2007

TABLE OF CONTENTS

<b>Combustion Issues and Approaches for Chemical Microthrusters (Invited Paper)</b> <i>R. A. Yetter, V. Yang, M. Wu, Y. Wang, D. Milius, I. A. Aksay, and F. L. Dryer</i>	<b>393</b>
<b>A New Approach to Chemical Micropropulsion – Can We Use Boundary Layers to Control Combustion? (Invited Paper)</b> <i>E. Oran</i>	<b>425</b>
<b>Pulse Detonation Engines: Progress and Challenges (Invited Paper)</b> <i>R. J. Santoro and S. Y. Lee</i>	<b>441</b>
<b>CFD Analyses of Low Frequency Combustion Instability in Solid Propellant Rocket Motors</b> <i>T. Morita, M. Hanzawa, T. Shimada</i>	<b>463</b>
<b>Advancements in Ultrasound Measurement on Large-Scale Solid Rocket Motors</b> <i>S. Ballereau, G. Fouin, M. Pawlowski</i>	<b>483</b>
<b>Insensitive High Energy Booster Propellant Suitable for High Pressure Operation</b> <i>M. L. Chan and A. D. Turner</i>	<b>501</b>
<b>Characterization of Rubbery Composite Propellant and its Compatibility with the Components of 70-mm Rocket Engines</b> <i>E. Quiñones and R. Guerra</i>	<b>511</b>

*International Journal of  
Energetic Materials and  
Chemical Propulsion*

*Volume 6 / Issue 5 , 2008*

**TABLE OF CONTENTS**

<b>Size Effect of Aluminum Nano-Particles on HTPB/AP Propellant Combustion</b> <i>J. F. Trubert, D. Lambert, and O. Orlandi</i>	<b>527</b>
<b>Combustion Behavior and Flame Structure of Nitromethane</b> <i>E. Boyer and K. K. Kuo</i>	<b>551</b>
<b>Electrolytic-Induced Decomposition and Ignition of HAN-Based Liquid Monopropellants</b> <i>G. A. Risha, R. A. Yetter, and V. Yang</i>	<b>575</b>
<b>Suppression of Dust-air Mixtures Explosions by Means of Water Spray</b> <i>P. Oleszczak and R. Klemens</i>	<b>589</b>
<b>New Numerical Approaches to Multiphase Flows Modeling</b> <i>C. E. Castro and E. F. Toro</i>	<b>609</b>
<b>Method of Characteristics Simulation of Interior Ballistic Processes of M1020 Ignition Cartridge in a 120-mm Mortar</b> <i>K. K. Kuo, R. Acharya, P. J. Ferrara, and J. D. Moore</i>	<b>629</b>
<b>Modeling and Simulation of Nano-Aluminum Synthesis in a Plasma Reactor</b> <i>N. Settumba and S. Garrick</i>	<b>651</b>

*International Journal of  
Energetic Materials and  
Chemical Propulsion*

Volume 6 / Issue 6 , 2008

**TABLE OF CONTENTS**

<b>Application of Artificial Neural Networks for Solution of Scientific and Applied Problems for Combustion of Energetic Materials</b> V. S. Abrukov, D. A. Troeshestova, A. S. Chernov, R. A. Pavlov, E. V. Smirnov, G. I. Malinin, and M. E. Volkov	<b>665</b>
<b>Combustion of Magnesium-Strontium Nitrate Pyrotechnic Mixture. Effect of Some Factors on Stable Combustion and Emission of Red Light</b> K. Riveros Flores, J. Perez Suarez, J. F. Alessandri, C. L. Villalon, and N. Orbovic	<b>681</b>
<b>Acoustic Emission Measurements for Characterizing Hydrocarbon/ Oxygen Diffusion Flame Behavior</b> J. D. Moore, G. A. Risha, B. Zhang, and K. K. Kuo	<b>691</b>
<b>Characterization of Solid Fuel Mass-Burning Enhancement Utilizing an X-ray Translucent Hybrid Rocket Motor</b> B. Evans, N. A. Favorito, E. Boyer, and K. K. Kuo	<b>713</b>
<b>Flame Structure under Doubly Transcritical Injection Conditions</b> G. Singla, P. Souflaire, C. Rolon, and S. Candel	<b>733</b>
<b>The Pressure Sensitivity of the Ultrasonic Waves Velocity: A Contribution to a Better Determination of the Energetic Material Regression Rate</b> F. Cauty, C. Carmicino, and A. Russo Sorge	<b>749</b>
<b>Gap Distance Effect on Burning Rate of Two Opposing JA2 Propellant Grains</b> P. J. Ferrara and K. K. Kuo	<b>775</b>
<b>Measurement of the Burning Velocity of Al-MoO<sub>3</sub> Powder Mixtures</b> R. Sobarzo and J. Rivera	<b>793</b>
