
TABLES OF CONTENTS

TELECOMMUNICATIONS AND RADIO ENGINEERING Volume 59, Numbers 1–12, 2003

Volume 59, Number 1&2, 2003

MATHEMATICAL METHOD IN DIFFRACTION THEORY

- Yu. K. Sirenko** Exact ‘Absorbing’ Conditions in Outer Initial Boundary-Value. Problems of the Electrostatics of Nonsinusoidal Waves. Part 3: Compact Inhomogeneities in Free Space1

ANTENNAS AND WAVE PROPAGATION

- Ya.S. Shifrin, A.I. Luchaninov, A.S. Posokhov** Structural Model of Antennas with Nonlinear Elements32
- G.A. Alexeev and M.V. Belobrova** Convolution-Type Equation of Inverse Refraction Problem49

RADAR SYSTEMS

- V.G. Sugak** Reconstruction of Electrical Constants of Soil and Depth of Subsurface Objects Using Data of Subsurface Sounding54
- A.I. Omelchenko and A.F. Katasonov** Procedure of Taking into Account the Effect of the Underlying Surface on the Measured Scattering Polarization Matrix of the Object64
- V.V. Zhirnov, O.G. Lebedev, and L.Z. Sakhnovskaya** Radar Interference Echoes Against Inhomogeneities of the Ground Level Environment. Experimental Performances and Statistical Model69
- A.P. Kondratenko and S.V. Shapovalov** Detection Coverage of Air Target in Bistatic Radar System with Television Illumination75

SOLID-STATE RADIO PHYSICS AND PLASMAS

- V.A. Abdulkadyrov, E.M. Khutoryan, and A.I. Tsvyk** Microwave Amplification Based on the Smith-Purcell Effect in a Distributed Semiconductor Structure79
- Yu.V. Arkusha, E.D. Prokhorov, and I.P. Storozhenko** Operation of Gunn Diode Containing Two $\text{InP}_{0.7}\text{As}_{0.3}\text{-In}_{0.4}\text{Ga}_{0.6}\text{As}$ Active Regions89
- I.P. Storozhenko** Modelling the Gunn Diodes Based on Variband Semiconductors100

MICROWAVE ELECTRONICS

- O.I. Belous, A.I. Fisun, and O.N. Sukhoruchko** Synthesis of Basic Components of a Low-Noise Input Circuit for Millimeter Wavelengths111
- V.M. Zinkivsky and O.M. Nikitenko** Vacuum State Investigation of Cross-Field Devices by Discharge Current Techniques119

THEORY AND METHOD OF RADIO CIRCUITS AND SIGNAL PROCESSING

O.G. Varfolomeeva, N.V. Katasova, and A.A.Sinyavin Minimization of the Quadratic Integral Estimate of the Transient Process Quality in the Dual-Connected Automatic Phase Control System	131
D.V. Ohruchak Iterative Phase Lock Systems Having a Scaling Adjusting Loop	138
I.V. Barishev and M.L. Uss Application of Fractal Compression Methods for Image Filtering	143
V.A. Chasovsky and M.P. Chernoborodov Digital System of Asynchronous Pulse Noise Cancellation	151

Volume 59, Numbers 3&4, 2003

MATHEMATICAL METHOD IN ELECTROMAGNETIC THEORY

Yu.K. Sirenko Exact ‘Absorbing’ Conditions in Outer Initial Boundary-Value Problems of the Electrodynamics of Nonsinusoidal Waves. Part 4: Pulse Antennas	1
A.I. Vyazmitinova and Yu.K. Sirenko Near Fields from Nonsinusoidal Wave Sources: A Numerical Analysis	16
O.V. Grimalsky and A.Ya. Lapovok Diffraction of Electromagnetic Waves by Metallic Shells Having a Ramified Geometry	28

MICROWAVE ELECTRODYNAMICS

A.A. Kirilenko and L.P. Mospan Rejection Irises as <i>E</i> -Plane Extracted Pole Filter Sections	40
A.A. Kirilenko, D.Y. Kulik, V.I. Tkachenko, and S.F. Kulishenko Generalization of the Partial Domain Method for the Waveguide Tee-Junctions with Metallic Inserts in the Interior Domain	49
A. A. Kirilenko, D. Yu. Kulik, S.L. Senkevich, and V. I. Tkachenko Extending “the Shorted Port Method” for Calculation of <i>S</i> -Matrices, Using Reduced Numerical Models	57
A.A. Lavrinovich, N.T. Cherpak, and E.N. Shaforost Two-Hemidisk Quasi-Optical Dielectric Resonators	67

RADAR REMOTE SENSING

V.N. Manzhos, S.N. Pshenichnykh, Ye.B. Krylov, and Yu.A. Poponin Bivariant Direction Finding of Noise Signal Sources with a Ring Phased Antenna Array Using Keytone and Music Methods	75
V.B. Razskazovsky and Yu.A. Pedenko Modeling Millimeter and Centimeter Wavelength Fields over the Sea in the Analysis of Elevation Angle Estimation Methods for Low-Flying Aerial Targets	82

APPLIED RADIO PHYSICS: SPACE, ATMOSPHERE AND EARTH SURFACE RESEARCH

A.P. Nickolaenko and L.M. Rabinowicz Diurnal Variations of Peak Frequencies of Schumann	
--	--

Resonance in the Gyrotropic Earth - Anisotropic Cavity	101
A.M. Gokov, O.F. Tyrnov Middle Latitude Ionospheric D-region Responses to Solar Events as Investigated by Partial Reflection Technique	114
Yu.V. Goncharenko and F.V. Kivva Evaluation of Size of the Atmospheric Aerosol Particles in the Reflecting Layers Occurring after Intense Solar Flares	135
G.P. Kulemin and Ye.V. Tarnavsky Spatial Statistical Characteristics of Soil	141

RADIOTECHNOLOGY IN BIOMEDICAL INVESTIGATION

V.A. Malakhov, G.I. Doroshenko, O.I. Belous, S.P. Sirenko, and A.I. Fisun Comparative Study into Efficiency of Treating the Initial Stage of Cerebral Ischemia with Low-Intensity Millimeter and Centimeter Electromagnetic Waves	151
G.I. Klochko, A.I. Logvinenko, and O.V. Sytnik Noninvasive Estimation of Temperature Gradient of Inner Layers of Living Tissues by the Ultrasonic Method	154

Volume 59, Number 5&6, 2003

MATHEMATICAL METHOD IN ELECTROMAGNETIC THEORY

Yu. K. Sirenko Exact 'Absorbing' Conditions in Outer Initial Boundary-Value Problems of the Electrodynamics of Nonsinusoidal Waves. Part 5: Plausible Extensions and Unresolved Problems	1
A.I. Vyazmitinova, A.O. Perov, and Y.K. Sirenko Exact Modeling of Transient Processes in Two-Dimensional Compact Open Resonance Structures	28
I.N. Shevchenko and V.G. Krizhanovsky Technique of the Quick Summation of Forces of Far Interaction between the Particles in N-Body Problem	37
N.V. Sidorchuk, V.V. Yachin, and S.L. Prosvirnin Low-Frequency Approximation for the Problem of Electromagnetic Wave Propagation in a Doubly- Periodic Magnetodielectric Layer	52

WAVE PROPAGATION AND SCATTERING

V.G. Gutnik, G.P. Kulemin, L.I. Sharapov and N.V. Gorbach Power Spectra of Radar Echoes from a Perturbed Sea Surface at Small Grazing Angles	60
V.G. Gutnik, N.V. Gorbach, V.N. Gorobetz, and L.I. Sharapov Fluctuation Statistics of Short-Wave Millimeter Waveband Radio Signals Propagating Above Sea Surface	76
V.A. Kortunov, V.N. Gorobets, F.V. Kivva, V.A. Kabanov, and I.S. Turgenev Study Into Altitude and Frequency Dependencies of Centimeter and Millimeter Radio Wave Signals Propagating Above Sea Surface	85

RADAR REMOTE SENSING

V.F. Zyukin, A.A. Gryzo and V.M. Andriishin The Surveillance Radar Potential for Moving Target Indication in the Presence of Inhomogeneous Passive Counter Measures	94
--	----

V.N. Oleynikov and B.L. Kashcheyev Radar Investigations into the Initial Radius of a Meteor Trail	106
O.I. Kharchenko and P.Yu. Sedyshev The Recursive Methods of Data Processing in Small-Base-Width-Angle-Range-Difference-Measurement Passive Radars	118
APPLIED RADIO PHYSICS: SPACE, ATMOSPHERE AND EARTH SURFACE RESEARCH	
S.I. Martynenko Effect of Powerful Electric Fields in the Mesosphere on Partially Reflected Radio Waves	127
A.M. Gokov On the Accuracy Increase of Determining the Lower Ionosphere Parameters Using Amplitude Measurements of Partially Reflected Signals	137
Yu.V. Gorishnya Modeling of Salinity Effect on Wet Soil Remote Sensing Characteristics in <i>L</i> - and <i>P</i> -Bands	147

Volume 59, Number 7, 8, and 9 2003

MATHEMATICAL METHOD IN ELECTROMAGNETIC THEORY

A.D. Barkov Application of the Factorization Method to the Problem of Wave Diffraction by Two-Dimensional Planar Metal-Dielectric Structures	1
A.A. Aleksandrova and Yu.N. Aleksandrov On the Wave Propagation and Transformation in Magnetohydrodynamic Medium	14
A.I. Kozar Figurate Numbers (Arithmetic Progression) and Electromagnetic Wave Scattering on Spatial Lattices of Resonant Magnetodielectric Spheres	22
A.G. Nerukh Fresnel Formulae in the Time Domain	33

ANTENNAS AND WAVE PROPAGATION

V.V. Radchenko Radiation from a Spherical-Circular Microstrip Patch Antenna Excited by a Slot	42
Ye.A. Yatsenko and N.M. Yatsenko Excitation of Mutually Perpendicular Dipoles	57
P.L. Tokarskiy Mutual Impedances Between Horizontal Electric Dipoles at the Interface Between Two Media	65
I.M. Mytsenko, A.V. Zatseryanaya, and D.D. Khalameyda Influence of Reflections from Sea Surface on Long-Distance Tropospheric Scattering	71
V.G. Gutnik, L.I. Sharapov, G.P. Kulemin, and V.B. Yefimov Wind Influence on the Sea Radar Backscattering Intensity: Computer-Calculated Estimation and Comparison with Experiment	76

RADAR REMOTE SENSING

V.M. Kartashov Signal Scattering Functions of Atmospheric Sounding Systems	88
I.M. Mytsenko and S.I. Homenko Distance Dependence of the Damping Factor for Metric and Decimetric Waves in an Inversion Layer Condition	95

E.V. Rogozkhin, V.A. Antonova, and L.Ya. Emelyanov Improvement in the Antenna Commutator Characteristics of Incoherent Scatter Radars	101
---	-----

QUANTUM ELECTRONICS

V.V. Shevchenko Analysis of Spectral and Temporal Characteristics of Radiation from Flashlamp-Pumped Tunable Dye Lasers	106
S.V. Nickolaev and V.V. Pozhar Extending the Tuning Range of Dye Lasers through Optimization of Active Element and Cavity Parameters	117
M.M. Bykov, M.I. Dzyubenko, and I.M. Rudchenko Simulation of the Pulse Mode of a Laser with Phototropic Q-Switch in the Conditions of Resonant Interaction of Thermal Noise with the Modulating Medium Substance	127
D.N. Makovetskii Saturation of Stationary Inversion States in a Three-Level Traveling-Wave Quantum Amplifier with Bistable Resonator Pumping	132
V.M. Kuzmichev and S.V. Pogorelov Measuring of Gaussian Beam Laser Pulse Parameters with Nonlinear Thin-Wire Bolometers	151
O.V. Gurin, V.A. Maslov, V.A. Svich, A.N. Topkov, and Ye.V. Fursova Formation of a Beam with a Uniform Intensity Distribution of Radiation in a Waveguide Quasi-Optical Resonator with an Amplitude-Stepped Mirror	159

APPLIED RADIO PHYSICS AND INDUSTRIAL ELECTRONICS

V.I. Beloglazov, A.N. Dovbnaya, and P.I. Mospan The Indicator of Oscillation Frequency for a Powerful Pulse Auto Generator	168
N.D. Koshevoi, M.V. Cehovski, and V.A. Gordiyenko Design of the Thickness Meters for Dielectric Coating	172
A.D. Yegorov, V.A. Yegorov, S.A. Yegorov, and E.V. Zdor The Photometry of Emission Optical Spectrum by Line Image Sensors	177

Volume 59, Numbers 10, 11, and 12 2003

MICROWAVE ELECTRODYNAMICS

A.V. Boriskin Numerical Simulation of 2-D Elliptic Dielectric Lens Employed for Improvement of Directivity of an Aperture Source	1
O.G. Tyzhnenko Two-Dimensional Scattering of H-Wave by a Dielectric Cylinder Half- Embedded in a Ground Plane	8
R.I. Belous, I.O. Bilous, and A.P. Motornenko Eigen Wavelength and Q-Factors of Circular Waveguide-Dielectric Resonator	18
A.A. Misyura and V.M. Onufriyenko Calculation of the Magnetic Wave Attenuation in a Rectangular Waveguide with Fractal Walls	25
V.A. Abdulkadyrov and G.N. Gestrina Interaction of Electromagnetic Wave with an Anisotropic Dielectric Substrate in the Presence of Periodic Shields	31
D.D. Ivanchenko, N.N. Kolchigin, S.L. Prosvirnin, and D.O. Tyrnov Experimental Investigation into the Frequency Dependence of the Transmission Factor Module of a	

Double-Periodic Array Consisting of C-shaped Stripline Elements	43
---	----

THEORY AND METHODS OF SIGNAL PROCESSING

O.P. Batayev, R.I. Deshin, and V.P. Polyakov A Technique for Estimating the Symbol-Error Probability in Walsh Function-Based Channels with Fast Fadings	48
--	----

MICROWAVE ELECTRONICS

Yu.V. Gandel, G.I. Zaghinaylov and S.A. Steshenko A New Semianalytic Method for Analyzing the Wave Fields of Coaxial Gyrotrons	57
A.N. Suvorov, V.D. Naumenko, and V.A. Myand Selecting the Starter Cathode for the Pulsed Magnetron with a Cold Secondary-Emission Cathode	73
G.S. Vorobyov, A.S. Krivets, M.V. Petrovsky, A.I. Tsyvk, and A.A. Shmatko The Smith-Pursell Effect Amplification of the Electromagnetic Waves in an Open Waveguide with a Metal-Dielectric Layer	80
M.V. Volovenko and O.M. Nikitenko Testing of a Software of Poisson's Equation Solution for Mathematical Model of a Millimeter Wave Magnetron	93
A.V. Soin Excitation of Oscillations in Magnetrons with Secondary-Emission Cathode by Means of an External Microwave Signal	100
A.S. Kleiman, P.A. Kravchenko, L.F. Kuchin, and A.D. Cherenkov On the Development and Application of Extremely-High-Frequency Generators Operating in a Wide Frequency Range	104

SOLID-STATE RADIO PHYSICS AND PLASMA

S.I. Khankina, V.M. Yakovenko, and I.V. Yakovenko Excitation of Surface Waves in Magnetoactive Plasma by a Moving Charged Particle	111
S.P. Martynuk, A.P. Motornenko, and I.G. Skuratovskii The Optimized Microwave Plasmatron with Nonequilibrium Plasma	119
A.V. Strizhachenko, A.A. Zvyagintsev, and V.V. Chizhov Dielectric Losses Measurement in Anisotropic Crystals	125

PHYSICAL PROCESSES IN ELECTRON DEVICES

S.A. Zuev, V.Yu. Tereshchenko, V.V. Starostenko, and A.A. Shadrin An Influence of Heat Processes on the Drift Characteristics of Semiconductor Structures	133
V.P. Makhniy, V.V. Mel'nyk, and M.V. Demych Photodetectors Based on the Gallium Phosphide-Arsenide Heterojunctions Produced by Isovalent Substitution Method	138
A.M. Korolev On an Increase in Stability of Low-Noise HEMT Amplifiers	142
A.A. Bulgakov, A.N. Kuleshov, and B.P. Yefimov Electron Trajectories in Magnetic Field of MPFS with Varying Longitudinal Component	152

APPLICATION OF RADIO TECHNOLOGY IN BIOMEDICAL INVESTIGATIONS

G.A. Bryzgalov and N.A. Khizhnyak Resonance Fine Structure of Electromagnetic Waves in a Dielectric Sphere161
G.A. Alexeyev and M.V. Belobrova Near Fields of a Three-Element Radiator in a Lossy Medium169
