TABLE OF CONTENTS FOR VOLUME 21
ATOMIZATION AND SPRAYS

PAGE RANGE OF ISSUES

Issue 1, 1-105; **Issue 2**, 107-188; **Issue 3**, 189-274 ; **Issue 4**, 275-361; **Issue 5**, 363-445; **Issue 6**, 447-535; **Issue 7**, 537-624; **Issue 8**, 625-709; **Issue 9**, 711-798; **Issue 10**, 799-881; **Issue 11**, 883-969; **Issue 12**, 971-1063;

Number 1

Dynamic Primary Atomization Characteristics in an Airblast Atomizer, High Pressure Conditions **1**
V. G. Fernández, G. Lavergne, and P. Berthoumieu

Geometric Primary Atomization Characteristics in an Airblast Atomizer, High Pressure Conditions **17**
V. G. Fernández, G. Lavergne, and P. Berthoumieu

CFD Study of Needle Motion Influence on the Exit Flow Conditions of Single-Hole Injectors **31**
X. Margot, S. Hoyas, P. Fajardo, and S. Patouna

Subgrid Analysis of Liquid Jet Atomization **41**
J. Chesnel, T. Ménard, J. Réveillon, and F.-X. Demoulin

The Delay Phenomena in Thermal Explosion of Polydisperse Fuel Spray—Using the Method of Integral Manifolds **69**
O. Nave, V. Gol'dshtein, and E. Dan

How Vegetable Oils and Their Derivatives Affect Spray Characteristics in CI Engines—A Review **87**
S.-Y. No

Number 2

Modeling Charge Preparation and Combustion in Diesel Fuel, Ethanol, and Dual-Fuel PCCI Engines **107**
S. L. Kokjohn, D. A. Splitter, R. M. Hanson, R. D. Reitz, V. Manente, and B. Johansson

Process for Coupling Optimization and Probability **121**
M. J. Opgenorth, W. E. McDermott, and C. Lengsfeld

Computational and Experimental Study of Jet Interaction Fluidic Injectors **127**
S. Bidadi, S. D. Heister, and Y. Matsutomi

Experimental Investigation of Aerodynamic Fragmentation of Liquid Drops Modified by Electrostatic Surface Charge **139**
D. R. Guildenbecher and P. E. Sojka

Extrapolation of Droplet Catch Measurements in Aerosol Application Treatments **149**
L. R. Khot, D. R. Miller, A. L. Hiscox, M. Salyani, T. W. Walker, and M. Farooq

Prediction of Evaporation Time and Rate of Water Sprays from Their Local Drop-Diameter Distributions and Liquid Volume Concentration **159**

P. Yongyingsakthavorn, P. Vallikul, C. Dumouchel, B. Fungtammasan, and K. Tuntivoranukul

Measurements of Diesel Spray Dynamics and the Influence of Fuel Viscosity Using PIV and Shadowgraphy **167**
L. C. Goldsworthy, C. Bong, and P. A. Brandner

Simulation of Flash Boiling in Pressure Swirl Injectors **179**
K. Neroorkar, S. Gopalakrishnan, R. O. Grover, Jr., and D. P. Schmidt

Number 3

A New Quality Methodology and Metrics for Spray Pattern Analysis **189**
I. W. Scheer and C. Beaumont

Characterization of Trajectory, Break Point, and Break Point Dynamics of a Plain Liquid Jet in a Crossflow **203**
Q. Wang, U. M. Mondragon, C. T. Brown, and V. G. McDonell

Impact of Physical Properties on Primary Breakup for a Diesel Nozzle Configuration **221**
M. A. Reddemann, F. Mathieu, D. Martin, and R. Kneer

Numerical Simulation of the Cavitating Flow in an Elliptical Nozzle **237**
J. G. Hong, K. W. Ku, and C. W. Lee

Influence of Two-Phase Feed Bubble Size on Effervescent Atomization in a Horizontal Nozzle Assembly **249**
J. Gomez, B. Fleck, J. Olfert, and J. McMillan

Droplet Size Distributions of Adjuvant-Amended Sprays from an Air-Assisted Five-Port PWM Nozzle **263**
J. Gu, H. Zhu, W. Ding, and H. Y. Jeon

Number 4

Molecular Dynamics Simulations of Rayleigh and First Wind-Induced Breakup **275**
K. F. Ludwig and M. M. Micci

On Simulating Primary Atomization Using the Refined Level Set Grid Method **283**
M. Herrmann

Examining Viscosity and Surface Wettability on Lamella Lift Dynamics and Droplet Splashing **303**
H. Vu, D. Banks, and G. Aguilar

Characterization of Full Cone Nozzles **317**
B. T. Kohnen, D. Pieloth, E. Musemic, and P. Walzel

Targeted Medical Sprays Stimulating Therapeutic Effects **327**
C. S. Lengsfeld and G. Aguilar

Characteristics of Hollow Cone Sprays in Crossflow **349**
S. S. Deshpande, J. Gao, and M. F. Trujillo

Number 5

An Experimental Study on Gasoline Direct-Injection Spray and Atomization Characteristics of Alcohol Fuels and Isooctane **363**
J. Zhang, S. Yao, H. Patel, and T. Fang

Mass Distribution Studies in Effervescent Sprays **375**
H. Gadgil, A. Dolatabadi, and B.N. Raghunandan

Comparison of Water-in-Oil Emulsion Atomization Characteristics for Low- and High-Capacity Pressure-Swirl Nozzles **391**
A. A. Narvaez, C. D. Bolszo, V. G. McDonell, D. Dunn-Rankin, and W. A. Sirignano

Vaporization Effects on Transient Diesel Spray Structure **411**
C. Bajaj, J. Abraham, and L. M. Pickett

Effect of Ethanol and Ambient Pressure on Port-Fuel-Injection Sprays in an Optically Accessible Intake Chamber **427**
S. Padala, S. Kook, and E. R. Hawkes

Number 6

Quantitative Analyses of Fuel Spray-Ambient Gas Interaction by Means of LIF-PIV Technique **447**
J. Zhu, K. Nishida, O. A. Kuti, & S. Moon

Experimental Studies on High-Pressure Spray Structure of Biofuels **467**
D. Deshmukh & R. V. Ravikrishna

Prediction of Size and Velocity Distributions in Sprays Formed by the Breakup of Planar Liquid Sheets Using Maximum Entropy Formalism 6 **483**
S. Nath, A. Datta, A. Mukhopadhyay, S. Sen, & T. J. Tharakan

Analysis of Transient Liquid and Vapor Phase Penetration for Diesel Sprays under Variable Injection Conditions **503**
J. V. Pastor, R. Payri, J. M. Garcia-Oliver, & F. J. Briceno

Measurement of Initial Conditions of a Kerosene Spray from a Generic Aeroengine Injector at Elevated Pressure **521**
S. Freitag, U. Meier, J. Heinze, T. Behrendt, & C. Hassa

Number 7

Phase Doppler Interferometry Volume Flux Sensitivity to Parametric Settings and Droplet Trajectory **537**
K. M. Bade & R. J. Schick

Spray Control for Maximizing Energy Efficiency and Reducing Emission in Combustion Engines **553**
N. Chigier, W. Bachalo, R. Reitz, J. Bellan, & M. Herrmann

Characterization of the Initial Spray from Low-Weber-Number Jets in Crossflow **575**
Y. Zheng & A. Marshall

CFD Simulation of Diesel Sprays over a Wide Range of Ambient Gas Densities Using an Improved Gas Jet Spray Mode **591**
C. H. Lee, Y. Wang, & R. D. Reitz

Experimental Study on Liquid Phase LPG Spray and Icing Phenomenon for a Middle Class Diesel Engine Application **611**
Y.-J. Kim, K.-B. Kim, & K.-H. Lee

Number 8

Spray Characteristics of a Pressure-Swirl Fuel Injector Subjected to a Crossflow and a Coflow **625**
A. Lynch, R. G. Batchelor, B. Kiel, J. Miller, J. Gord, & M. Reeder

Experimental Study on Rock Breaking by a Combined Round Straight Jet with a Swirling Jet Nozzle **645**
D. Ma, G. Li, X. Zhang, & Z. Huang

Effect of Internal Flow Structure in Circular and Elliptical Nozzles on Spray Characteristics **655**
K. W. Ku, J. G. Hong, & C. W. Lee

Correlations for Penetration Height of Single and Double Liquid Jets in Cross Flow under High-Temperature Conditions **673**
H. J. Yoon, J. G. Hong, & C. W. Lee

Average Droplet Diameter Spatial Distribution in a Spray after Gas-Assisted Premixed Atomization **687**
K. Pougatch, J. McMillan, & M. Salcudean

Number 9

Large Eddy Simulation of Liquid Jet Atomization **711**
J. Chesnel, J. Reveillon, T. Ménard, & F. X. Demoulin

Spray Structure Analysis in Atomization Processes in Enclosures for Powder Production **737**
A. Lampa & U. Fritsching

Analysis of Diesel Spray Atomization by Means of a Near-Nozzle Field Visualization Technique **753**
R. Payri, F. J. Salvador, J. Gimeno, & J. De la Morena

Single-Wave Kelvin-Helmholtz Instability in Nonparallel Channel Flow High-Temperature Conditions **775**
A. Orazzo, G. Coppola, & L. de Luca

Numerical Modelling of Droplet Evaporation with Convection for n-Alkanes and Kerosene Fuel **787**
S. Dirbude, V. Eswaran, & A. Kushari

Number 10

The Effect of Initial Ambient Turbulence Levels on Iso-Octane Injection Sprays **799**
I. Elbadawy, P. H. Gaskell, M. Lawes, & H. M. Thompson

Numerical Investigation of Two-Phase Flow in an Effervescent Atomizer for Water Mist Fire Suppression **819**
L. Pan, G. Yang, & B. Li

Droplet Impact on Shear-Driven Liquid Films **833**
S. Alghoul, C. Eastwick, & D. Hann

Effect of Nozzle Geometry on Breakup Length and Trajectory of Liquid Jet in Subsonic Crossflow **847**
M. Birouk, B. Nyantekyi-Kwakye, & N. Popplewell

Burning of Water-in-Dodecane Compound Drops **867**
C.-K. Chen & T.-H. Lin

Number 11

Spray Characteristics of Diesel Fuel Containing Dissolved CO2 **883**
M. Karaeen & E. Sher

Droplet Size and Velocity Measurements at the Outlet of a Hollow Cone Spray Nozzle **893**
A. Foissac, J. Malet, M. R. Vetrano, J.-M. Buchlin, S. Mimouni, F. Feuillebois, & O. Simonin

Mono- and Multi-Component Droplet Cooling/Heating and Evaporation: Comparative Analysis of Numerical Models **907**
A. E. Elwardany, I. G. Gusev, G. Castanet, F. Lemoine, & S. S. Sazhin

Spray Process Modeling in Metal Matrix Composite Powder Production **933**
X. G. Li, L. Heisterüber, L. Achelis, V. Uhlenwinkel, & U. Fritsching

Atomization of Gelled Propellants from Swirl Injectors with Leaf Spring in Swirl Chamber **951**
L. Yang, Q. Fu, W. Zhang, M. Du, & M. Tong

Number 12

Internal Flow Characteristics of Liquid-Liquid Swirl Coaxial Injectors with Different Recess Lengths and Oxidizer-Fuel Ratios **971**
S. Kim, J. Yoon, & Y. Yoon

Experimental Study on Spray Angle and Velocity Distribution of Diesel Spray under High Ambient Pressure Conditions **989**
Y. Zama, W. Ochiai, T. Furuhata, & M. Arai

Steady and Transient Droplet Dispersion in an Air-Assist Internally Mixing Cone Atomizer **1009**

A. A. Aliabadi, K. W. J. Lim, S. N. Rogak, & S. I. Green

The Energy Spectrum Analogy Breakup (SAB) Model for the Numerical Simulation of Sprays **1033**
C. Habchi

Analytical Criterion for Droplet Breakup **1059**
I. Sher & E. Sher

INDEX to Volume 21 **1065**

AUTHOR INDEX – Volume 21

droplet size, 1
droplet splash, 833
droplet trajectory, 537
droplet velocity distribution,893

droplet, 303,907,1009,1059
dynamic breakup, 203
dynamic drag model, 1033
effervescent atomization, 249,819
effervescent atomizers,375
elastic-backscatter LIDAR, 149
elevated air pressure, 521
elliptical nozzle, 237,655
engine modeling, 107
entrainment coefficient, 591
ethanol, 363,427,907
Eulerian Lagrangian spray atomization model, 711
evaporation constant,787
evaporation rate, 159
evaporation time, 159
evaporation, 907
experiment, 553
feedback-free oscillator, 127
film thickness, 819
film wave regime, 833
flash boiling, 179,883
flow control, 127
fluidic injector, 127
fuel flux measurements, 521
fuel properties, 221
fuel sprays, 799
fuel viscosity, 167
fuel, 203
fuel, injector, 625
full cone swirl nozzles, 317
gas density, 591
gas jet spray model, 591
gas jets, 411
gasoline direct injection, 179,799
gas-to-liquid mass flow ratio, 819
GDI, 363
gelled propellant, 949
heat conduction, 907
heating, 907
high speed video,203
high-pressure swirl injectors, 179
high-pressure testing, 1, 17
hollow cone sprays, 349
horizontal two-phase flow, 249
icing phenomenon, 611
image analysis, 203
image processing, 17
imaging, 1009
impact, 303
injection, 753
internal flow, 237
internal mixing, 971,2009
intranasal sprays, 327
isooctane, 363
jet penetration height, 673
jet pressure, 645
JICF (jet in cross flow), 673
Kelvin-Helmholtz instability, 775
Lagrangian approach, 1033
large eddy simulation, 711
laser diffraction,189
laser light sheet imaging, 189
leaf spring, 949
LES, 41, 1033
LIDAR calibration, 149
LIF-PIV, 447
ligaments, 17
liquefied petroleum gas, 611
liquid film thickness, 971
liquid jet, 203,847
liquid length, 503
liquid penetration, 87
liquid spray, 159,1033
liquid volume concentration, 159
low flow, 391
low-temperature combustion, 107
LPG, 611
mass flow rate, 447
mathematical modeling, 687
maximum entropy principle, 483
mechanical patternation, 375
medical device coating, 189
medical sprays, 327
metal matrix composite, 933
method of integral manifolds, 69
micro nozzle, 189
micro-explosion, 867
micro-hole nozzle, 447
microscope, 167
Mie scattering, 427
molecular dynamics, 275

momentum flux ratio, 971
moving boundary, 907
moving mesh, 31
multi-component fuel, 907
multihole nozzle, 503
multiple injections, 503
multi-scale model, 933
nasal sprays, 189
near-nozzle, 753
non-intrusive spray analysis, 189
nonparallel channel flow, 775
nozzle and spray characterization, 317
nozzle geometry, 847
number density, 537
numerical simulation, 237
O/F ratio, 971
ocular sprays, 327
open FOAM, 349
optical patternation, 375
optical patternator,189
optimization design, 121
oscillation frequency, 1, 127
parametric sensitivity, 537
particle imaging velocimetry, 737
particle number density, 687
particle size distribution (PSD), 363
particle size, 249
particle tracking velocimetry (PTV), 1009
patternation, 391
PDI,537
penetration, 611
pesticide, 263
phase Doppler anemometry, 521,625,893
phase Doppler interferometry, 537
PIV, 167,989
pollutant emissions reduction, 107
port fuel injection, 427
power-law fluid, 949
precision farming, 263
preferential concentration, 737
pressure, 303
primary atomization, 275,283,753
primary breakup, 221,711
probability density function, 69
propulsion, 625
PTV, 167
pulmonary drug delivery, 327
quasi-steady theory, 787
Rayleigh breakup, 275
recess length, 971
rock breaking, 645
secondary atomization, 139
secondary breakup, 1059
seen speed, 1033
shadowgraphy, 167,1009
shot-to-shot variability, 167
simulation, 283,553
size scaling of nozzles, 317
