

**International Journal of
Multiscale Computational Engineering**

TABLE OF CONTENTS FOR VOLUME 12

INTERNATIONAL JOURNAL FOR MULTISCALE COMPUTATIONAL ENGINEERING

Page Numbers for Issues:

Issue 1: 1-89; **Issue 2:** 91-175; **Issue 3:** 177-269;
Issue 4: 271-360; **Issue 5:** 361-463; **Issue 6:** 465-566

NUMBER 1

Investigation of Micro-Macroscopic Interaction of Heterogeneous Materials by a Parallel-Bonded Particle Model and Introduction of New Microparameter Determination Formulations	1
<i>S. Nohut & A. Cevik</i>	
Modeling of Two-Phase Grain Structure in the Titanium Alloy Ti-6Al-4V Using Cellular Automata	23
<i>A. Krumphals, C. Poletti, F. Warchomicka, M. Stockinger, & C. Sommitsch</i>	
Boundary Element Method Modelling of Nanocomposites	33
<i>J. Ptaszny, G. Dziatkiewicz, & P. Fedeliński</i>	
Reduced-Order Multiscale-Multiphysics Model for Heterogeneous Materials	45
<i>Z. Yuan, T. Jiang, J. Fish, & G. Morscher</i>	
Sensitivity Analysis of Transient Temperature Field in Microdomains with Respect to the Dual-Phase-Lag Model Parameters	65
<i>E. Majchrzak & B. Mochnacki</i>	
Bioinspired Identification of Parameters in Microscale Heat Transfer	79
<i>J. Dziatkiewicz, W. Kuś, E. Majchrzak, T. Burczyński, & Ł. Turchan</i>	

NUMBER 2

Computer-Aided Derivation of Multiscale Models: A Rewriting Framework	91
<i>B. Yang, W. Belkhir, & M. Lenczner</i>	
Interphase and Aggregation: Two Effective Parameters on Mechanical behavior of Polymer Nanocomposites	115
<i>S. Arabnejad, H. Pouriayevali, G.S. Lim, D.W.C. Cheong, & V.P.W. Shim</i>	
A Multiscale Computational Method for 2D Elastoplastic Dynamic Analysis of Heterogeneous Materials	127
<i>H. Zhang & H. Liu</i>	
Discrete Element Model for in-Plane Loaded Viscoelastic Masonry	155
<i>D. Baraldi & A. Cecchi</i>	

NUMBER 3

Hybrid Lattice Boltzmann and Finite Volume Methods for Fluid Flow Problems <i>Z. Li, M. Yang, & Y. Zhang</i>	177
An Adaptive Finite Element Multiwavelet-Based Method for Elastic Plate Problems <i>Y. Wang, Q. Wu, & Y. Fan</i>	193
Investigation on Interfacial Thermal Resistances of Al/Cu Structure by Using Hybrid Modeling with Multiscale Characteristics <i>P. Yang, Y. Zhao, L. Zhang, Y. Tang, & H. Yang</i>	211
A Multiscale Modeling Scheme Based on Perydynamics Theory <i>R. Rahman, J.T. Foster, & A. Haque</i>	223
On the Strength Reliability of Statistically Heterogeneous Materials with Microstructure at Diverse Scales <i>G.N. Frantziskonis</i>	249
Development of Three-Dimensional Adaptive Mesh Generation for Multiscale Applications <i>F. Krużel, Ł. Madej, K. Perzyński, & K. Banaś</i>	257

NUMBER 4

Nonlinear Multiscale Homogenization of Carbon Nanotube Reinforced Composites with Interfacial Slippage <i>D. Savvas & V. Papadopoulos</i>	271
Efficient Fatigue Simulation Using Periodic Homogenization with Multiple Time Scales <i>G. Puel & D. Aubry</i>	291
Multiscale Modeling for Stochastic Forest Dynamics <i>M. Comboul & R. Ghanem</i>	319
Some General Representations in Thermoperistatics of Random Structure Composites <i>V.A. Buryachenko</i>	331
Three-Dimensional Topography Evolution Algorithm for Ion Beam Etching Process <i>K.-D. Li</i>	351

NUMBER 5

Two-Scale Numerical Homogenization of the Constitutive Parameters of Reactive Powder Concrete <i>A. Denisiewicz & M. Kuczma</i>	361
Nonlocal/Coarse-Graining Homogenization of Linear Elastic Media with Non-Separated Scales Using Least-Square Polynomial Filters <i>J. Yvonnet & G. Bonnet</i>	375
Numerical Modeling of Phase Transformation in Dual Phase (DP) Steel after Hot Rolling and Laminar Cooling <i>M. Pernach, K. Bzowski, & M. Pietrzyk</i>	397
Dislocation Core Reconstruction Based on Finite Deformation Approach and Its Application to 4H-SiC Crystal	411

<i>J. Cholewiński, M. Maździarz, G. Jurczak, & P. Dlużewski</i>	
Homogenization of the Spectral Equation in One Dimension	423
<i>T. T. Nguyen, M. Lenczner, & M. Brassart</i>	
A Reduced Computational Model for Prediction of Electrical Resistance in Fibrous Composites	451
<i>X. Guo, Y.-B. Yi, & M. S. Kumosa</i>	
<u>NUMBER 6</u>	
Generalized Multiscale Finite Element Methods: Oversampling Strategies	465
<i>Y. Efendiev, J. Galvis, G. Li, & M. Presho</i>	
Comparison of Two-Dimensional—One-Dimensional Coupling Methods for Time-Harmonic Elasticity	485
<i>Y. Ofir, D. Rabinovich, & D. Givoli</i>	
A Study of Scale Effect of Composite Laminated Plates Based on New Modified Couple Stress Theory by Finite-Element Method	507
<i>C. Wanji, Y. Shengqi, & L. Xiaopeng</i>	
Multiscale Multiphysic Mixed Geomechanical Model in Deformable Porous Media	529
<i>S.A. Sadrnejad, H. Ghasemzadeh, & E. Taheri</i>	
A Simulation-Based Upscaling Technique for Multiscale Modeling of Engineering Systems under Uncertainty	549
<i>R.M. Gorguluarslan & S.-K. Choi</i>	
INDEX to Volume 12	567
