

SUBJECT INDEX — VOLUME 6

Journal of Women and Minorities in Science and Engineering

Page Numbers for Issues:

Issue 1, 1–94; **Issue 2**, 95–187; **Issue 3**, 191–264; **Issue 4**, 265–372

- African women
 - achievement in science, influence of family on, 191
- African-American
 - female high school students, experiences in science, 265, 295
 - high school students, retention in engineering, 221
 - social construction of gender, 265
- Appalachian culture
 - impact upon girls, in science and math, 45
- Career
 - influence of families on women's choice of, 169
 - issues of women engineers and scientists, 95, 251
- Caribbean women
 - achievement in science, influence of family on, 191
- Computer science
 - prospectuses, impact on recruitment of women in the United Kingdom, 331
- Construction industry
 - women in the United Kingdom in, 73
- Discourse analysis
 - of prospectuses in computer science, in the United Kingdom, 331
- Electronic communities
 - as support networks for women in science and technology, 115
- Electronic mail
 - impact of gender on advice sought via, 33
- Elementary school students
 - attitudes toward science, 87
 - girls, interest in science and mathematics, 207
- Engineering
 - agricultural, successful women in, 229
 - biological, successful women in, 229
 - retention of
 - female graduate students and faculty in, 313
 - female undergraduates in, 349
 - underrepresented high school students in, 221
- Ethnicity
 - and science policy in the United States, 1
- Gender
 - impact upon
 - advice given via electronic mail, 33
 - communication in a high school science lab, 295

- influence of, on early science training, 169
- interaction and confidence in science, mathematics and technology, 155
- and science policy, in the United States, 1
- social construction of, in African American communities, 265

Geoscience

- attitudes of female undergraduates about, 131

Graduate students

- use of electronic mail to seek career advice, 33
- female, retention of
 - in natural sciences, math, and engineering, 313
 - in science, 251

Group dynamics

- in science instruction, high school students, 295

High school students

- African American, retention in engineering, 221
- African-American females, experiences in science, 265, 295
- learning disabled, and group interaction in science class, 295

Laboratory

- climates, effect upon careers of women engineers and scientists, 95
- communication styles, effect upon retention of women in science, 251

Learning disability

- effect upon participation in high school science class, 295

Mathematics

- Appalachian middle school girls, experiences in, 45
- elementary school girls, interest in, 207
- gender interaction and confidence in, 155
- retention in
 - female graduate students and faculty, 313
 - female undergraduates, 349

Middle school students

- Appalachian girls, experiences in math and science, 45

Minorities

- as a statistical category in the United States, 1

National Science Foundation

- Professional Opportunities for Women in Research and Education (POWRE) program, 95

- role in policy making in the United States, 1

- Professional Opportunities for Women in Research and Education (POWRE) Awardees, challenges of, in laboratory settings, 95

Prospectuses

- impact of discourse in, upon women interested in computer science, 331

Race

- effects of, upon achievement in science, 191, 265
- and science policy in the United States, 1

Research

- as a means of increasing retention of
 - graduate women and faculty in math, science, and engineering, 313
 - undergraduate women in math, science and engineering, 349

- Role models
 - intergenerational, effect upon girls' interest in science, 207
- Science
 - African-American high school students, experiences in, 265
 - confidence in, as impacted by gender interaction, 155
 - elementary school girls' interest in, 207
 - elementary students' attitudes about, 87
 - instruction, group work in, 295
 - laboratories
 - climate in, 95
 - communication styles in, 251
 - natural, retention of female graduate students and faculty in, 313
 - policy, cultural impact upon in the United States, 1
 - retention in
 - female undergraduates, 349
 - female graduate students, 251
 - training, family influences on, 169
- Technology
 - impact of gender on confidence in, 155
- Undergraduates
 - confidence in science, mathematics, and technology, 155
 - females
 - attitudes about geoscience, 131
 - in computer science in the United Kingdom, 331
 - retention of, in math, science, and engineering, 349
- Women
 - in construction industry in the United Kingdom, 73
 - faculty, in agricultural and biological engineering, 229
 - as a statistical category in the United States, 1
- United Kingdom
 - recruitment of women into computer science in, 331
 - women in construction industry in, 73
- United States
 - science and engineering policy in, 1
