

TsAGI SCIENCE JOURNAL

CONTENTS, VOLUME 48, 2017

Issue 1: 1-114; Issue 2: 115-212; Issue 3: 213-306; Issue 4: 307-398; Issue 5: 399-492; Issue 6: 493-596; Issue 7: 597-682; Issue 8: 683-789

Issue 1

- The Investigation of the Preferable Interference of a Tractor and Pusher Propellers Mounted on the Wing Tips** 1
A.V. Kornushenko, O.V. Kudryavtsev, L.L. Teperin, L.N. Teperina, A.V. Shustov, F. Orfinejad, & Myo Thein
- Numerical Investigations of the Effects of Shapes and Sizes of the Gap between the Lifting Surface and Control Surface with the Overhang Balance on Its Effectiveness and Hinge Moment** 11
V.V. Bogatyrev
- Translational Nonequilibrium Thin Shock Layer on Simple Bodies** 25
A.L. Ankudinov
- Application of Various Models of Turbulence for Calculation of Incompressible Internal Flows** 31
P.A. Baranov, S.V. Guvernyuk, M.A. Zubin, S.A. Isaev, & A.E. Usachov
- Experimental Investigations of Wing Lift Control by Actuators Distributed on the Wing Surface** 43
A.G. Nalivaiko, A.Yu. Urusov, A.A. Uspenskii, M.V. Ustinov, & Ja.Sh. Flaxman
- Nonequilibrium Aerosol Flow in a Supersonic Wind Tunnel** 61
I.A. Amelyushkin, Yu.Kh. Ganiev, O.A. Gobyzov, Yu.M. Lipnitskii, Yu.A. Lozhkin, & S.E. Filippov
- Structural Design of Helicopter Wing based on Topology and Global-Local Optimization** 81
Yu.S. Alexandrin, S.A. Tuktarov, & V.V. Chedrik
- Investigation of Single-Mode Flutter of Various Shape Plates at Low Supersonic Speeds** 97
F.A. Abdukhakimov & V.V. Vedeneev
- Contribution of TsAGI to the Development of Electric Propulsion Engines for Aerospace Vehicles: To the 50th Anniversary of the National Program “Yantar”** 111
A.S. Filatyev & V.V. Skvortsov

Issue 2

- Effect of Vortex Breakdown on Lateral Aerodynamic Coefficients of a Maneuverable Aircraft Model** 115
K.A. Osipov
- Investigation of Laminar–Turbulent Transition on the Wing Section at Various Reynolds Numbers** 127
V.V. Vozhdaev, P.P. Vorotnikov, A.F. Kiselev, L.L. Teperin,

& L.L. Chernyshev

Choice and Design of a 3D Fixed-Geometry Inlet for a Small Supersonic Business Aircraft	141
<i>V.A. Vinogradov, Ya.A. Melnikov, & V.A. Stepanov</i>	
Equivalent Method of Acoustic Certification of Aircraft Family with the Modified Power Plant	159
<i>V.G. Dmitriev & V.F. Samokhin</i>	
Application of Spectral Pyrometry in Aerodynamic Experiments to Measure Temperature of Surface and Flame	173
<i>I.V. Senyuev</i>	
Two Methods for Calibration of Strain-Gauge Balances using TsAGI Balance Calibration Machines	187
<i>V.S. Volobuyev, A.R. Gorbushin, I.A. Sudakova, & V.I. Tikhomirov</i>	
Rate of Fatigue Crack Growth in the Adhesive Bonded Joints under Combined Action of the Moment, Axial and Transverse Tear Forces	199
<i>E.V. Stepnov</i>	

Issue 3

About a Propeller behind the Airfoil Trailing Edge in Transonic Flow	213
<i>S.G. Ignatiev, L.N. Teperina, & M. El-Salamony</i>	
The High-Speed Flow Stability (HSFS) Software Package for Stability Analysis of Compressible Boundary Layers	223
<i>A.O. Obraz & A.V. Fedorov</i>	
Intact Flow over a Rotating Body with the Nose Part in the Form of the Riabouchinsky Half-Cavity	243
<i>E.N. Kuznetsov, V.Yu. Lunin, A.V. Panyushkin, & I.L. Chernyshev</i>	
Computational Investigation of the Influence of a Complex Spatial Configuration Inlet on the Performance Characteristics of an Aviation Gas-Turbine Engine with a High Bypass Ratio	251
<i>S.E. Krasnov, O.P. Minin, D.A. Olishhevskii, & S.G. Shevel'kov</i>	
Experimental Investigation of a 3D Fixed-Geometry Inlet for a Supersonic Business Aircraft	261
<i>V.A. Vinogradov, A.Yu. Makarov, N.A. Melkonyan, & V.A. Stepanov</i>	
Experimental Studies of the Air Intake in a Free-Molecular Gas Flow	277
<i>A.I. Erofeev, A.P. Nikiforov, & V.V. Plugin</i>	
An Algorithmic Base for Analysis of Loading Conditions of Launch Vehicle Structure at Motion in Dense Atmosphere	295
<i>V.A. Titov</i>	

Issue 4

Froude Model of Ideal Propeller in Nonuniform Flow	307
<i>L.L. Teperin, L.N. Teperina, F. Orfinejad, M. El-Salamony, & M. Thein</i>	
Interaction of Mach Waves and Boundary Layer at a Supersonic Flow over a Plate with a Sharp Leading Edge	317
<i>Q.H. Din, I.V. Egorov, & A.V. Fedorov</i>	

Fluid Micropolarity Influence on Laminar Boundary Layer Separation	331
<i>F.A. Abramov, M.A. Brutyan, & V.E. Kovalev</i>	
Specific Features of Deceleration of a High-Velocity Flow in Convergent Fixed-Geometry Inlets	341
<i>V.A. Vinogradov, N.V. Guryleva, M.A. Ivan'kin, & V.A. Stepanov</i>	
Computational and Experimental Investigations of Flow Characteristics in a Curvilinear Inlet Channel	357
<i>D.V. Anokhin, E.S. Dyagileva, O.P. Minin, D.A. Olishhevskii, & S.G. Shevel'kov</i>	
Experimental Investigations of Wall Interference Effect on Model Test Results at TsAGI T-106 Wind Tunnel	363
<i>P.V. Savin</i>	
Determination of Residual Stresses and Stress Intensity Factors by Removing Local Material	377
<i>S.I. Eleonsky, I.N. Odintsev, V.S. Pisarev, & S.M. Usov</i>	
<u>Issue 5</u>	
Using the Discontinuous Galerkin Method for Solving a System of Equations of the Dynamics of Water Droplets in an Air Flow	399
<i>A.V. Volkov & T.D. Duong</i>	
Numerical and Experimental Investigations of a Peniche Structure Influence on Aerodynamic Characteristics of Large-Scale Fuselage Half-Model	417
<i>A.A. Ptitsin</i>	
Conception of a Thrust Reversing-Vectoring Apparatus of Cascade Type with Nutating Vanes	425
<i>O.V. Egorov, E.V. Myshenkov, A.S. Polev, & E.Yu. Shelgunov</i>	
Improvement of Rolling Ability Efficiency of Maneuverable Fighters with Twin Vertical Tails at High Angles of Attack	441
<i>Yu.I. Arzhanov & S.A. Ivanov</i>	
Method for Analysis of Alternatives in Conceptual Design in Aeronautical Engineering	459
<i>E.B. Skvortsov & A.S. Shelekhova</i>	
Formation of Launch Vehicle Loading Regimes for Adaptation of Transportation to the "Vostochny" Cosmodrome	469
<i>V.A. Titov</i>	
Application of the Biorthogonalization Vectors Procedure to Applied Strength Problems	479
<i>J.F. Yaremchuk</i>	
<u>Issue 6</u>	
On a Boundary Layer in a Separated Flow Region	493
<i>G.L. Korolev & Vic.V. Sychev</i>	
Self-Similar Solutions of the Jeffery-Hamel Type for Compressible Viscous Gas Flow	505
<i>M.A. Brutyan</i>	

Simulation of the Flow in Aircraft Complex Pneumatic Lines	515
<i>A.A. Efremov</i>	
Investigations of Volume-Centered Discharge in Air Supersonic Flow with Additional Propane and Oxygen Injection	535
<i>V.K. Alatortsev, S.I. Inshakov, I.S. Inshakov, A.F. Rozhkov, V.V. Skvortsov, A.Yu. Urusov, & A.A. Uspenskii</i>	
Comparison of Flight Path Optimization Problem Solutions by Direct and Indirect Methods for a Guided Aircraft Missile with a Rocket Engine	551
<i>S.A. Lyovin</i>	
Application of the Polynomial Ritz Method for Analyzing Dynamic Aeroelasticity Characteristics by Taking into Account Gyroscopic Forces	565
<i>F.Z. Ishmuratov, A.G. Kuznetsov, & V.A. Mosunov</i>	
Numerical Methods for Determining Torsional Stiffness of Prismatic Rods	579
<i>V.M. Uskov, A.V. Chedrik, & V.V. Chedrik</i>	
<u>Issue 7</u>	
About Verification and Validation of Computational Methods and Codes on the Basis of Godunov Method	597
<i>S.M. Bosnyakov, A.R. Gorbushin, I.A. Kursakov, S.V. Matyash, S.V. Mikhailov, & V.Yu. Podaruev</i>	
Exact Solution to the Thermal Boundary Layer Equation for Cylinders in Fluids with Low Prandtl Numbers	617
<i>A.V. Kashevarov</i>	
Approbation of a Continuous Balance Testing Technique in the T-128 Transonic Wind Tunnel at Subsonic Velocities	627
<i>K.D. Bukharov, A.R. Gorbushin, Yu.V. Kartashev, V.V. Petronevich, I.A. Sudakova, & S.L. Chernyshev</i>	
Asymptotic Evaluations of Heat-Exchange Characteristics using Thin-Film Temperature Sensors	649
<i>E.P. Stolyarov</i>	
Laminated Composite Stiffness and Strength Estimation Method	661
<i>V.D. Vermel, A.I. Oleinikov, & L.L. Chernyshev</i>	
Shimmy Analysis of Light Airplane Main Landing Gear	665
<i>V.D. Chuban</i>	
The Solution to the Problem of Deflections of a Rectangular Thin Isotropic Plate with All Built-In Edges in the Equations for the Bending Moments	673
<i>J.F. Yaremchuk</i>	
<u>Issue 8</u>	
New Type of Pulsed Thermal Actuator	683
<i>A.V. Voevodin, A.A. Korniyakov, A.S. Petrov, D.A. Petrov, & G.G. Soudakov</i>	
Control of Vortex Flow over a Maneuverable Aircraft Model using Nose Flaps at Large Angles of Attack	699
<i>K.A. Osipov</i>	

Mixing Layer Structure of a Jet in a Wind Tunnel with an Open Test Section	711
<i>N.I. Batura, V.V. Vozhdaev, G.G. Gadzhimagomedov, & I.I. Lipatov</i>	
Three-Dimensional Afterbody Drag with Nozzle Jet	723
<i>G.N. Lavrukhin & V.A. Talyzin</i>	
Noncontact Measurements of Wing Box Deformation during Strength Tests by Videogrammetry Method	751
<i>V.P. Kulesh, K.A. Kuruliuk, & M.A. Fedotov</i>	
Tasks of the Modal Test and Reproduction of Forces by Means of Electromechanical Simulation	761
<i>V.I. Smyslov</i>	
Beam Stiffness of a Composite Wing with Anisotropic Skin	773
<i>E.I. Kryuchkov</i>
