

TABLE OF CONTENTS FOR VOLUME 25

ATOMIZATION AND SPRAYS

PAGE RANGE OF ISSUES

Issue 1:1-98; Issue 2: 99-188; Issue 3: 189-284; Issue 4: 285-374;
Issue 5: 375-452; Issue 6: 453-538; Issue 7: 539-642; Issue 8: 643-736;
Issue 9: 737-836; Issue 10: 837-931; Issue 11: 933-1024; Issue 12: 1025-1125

Number 1

Effect of Recess Length on Instability in a Gas-Centered Liquid Annular Jet	1
<i>J.M. Chung, J. Yoon, & Y. Yoon</i>	
Thin-Film Formation by Using Flash-Boiling Spray	23
<i>M. Oshima, J. Senda, & K. Ishida</i>	
Atomization Modelling of Liquid Jets Using a Two-Surface-Density Approach	47
<i>B.M. Devassy, C. Habchi, & E. Daniel</i>	
Effects of Cross-Flow on Fuel Spray Injected by Hole-Type Injector for Direct Injection Gasoline Engine	81
<i>M. Guo, R. Kishi, B. Shi, Y. Ogata, & K. Nishida</i>	

Number 2

Two-Dimensional Instability Response of an Electrified Viscoelastic Planar Liquid Sheet Subjected to Unrelaxed Axial Elastic Tension	99
<i>M.-X. Tong, Q.-F. Fu, & L.-J. Yang</i>	
Hydrodynamic Instabilities of Two Viscoelastic Liquid Sheet Models in an Inviscid Gas Medium	123
<i>M.F. El-Sayed, G.M. Moatimid, F.M.F. Elsabaa, & M.F.E. Amer</i>	
Internal and External Flow Characteristics of Swirl Atomizers: A Review	153
<i>G.A. Vijay, N.S.V. Moorthi, & A. Manivannan</i>	

Number 3

Spray in Automotive Applications: Part I	vii
<i>Q. Xue & S. Som</i>	
Eulerian Moment Methods for Automotive Sprays	189
<i>O. Emre, D. Kah, S. Jay, Q.-H. Tran, A. Velghe, S. de Chaisemartin, R.O. Fox, F. Laurent, & M. Massot</i>	
Numerical Investigation of a Stratified Charge Compression Ignition Engine with Late Injection under Low-Load Noncombusting Conditions	255
<i>H. Zhang, E.R. Hawkes, S. Kook, & W. Hwang</i>	

Number 4

Spray in Automotive Applications: Part I	vii
<i>Q. Xue & S. Som</i>	
Study on Spray Induced Turbulence Using Large Eddy Simulations	285
<i>S. Banerjee & C.J. Rutland</i>	

A Gibbs Energy Relaxation (GERM) Model for Cavitation Simulation 317
C. Habchi

A Spherical Volume Interaction DDM Approach for Diesel Spray Modeling 335
R. Torelli, G. D'Errico, T. Lucchini, V. Ikonomou, & R.M. McDavid

Number 5

Spray in Automotive Applications: Part II vii
Q. Xue & S. Som

Morphological Exploration of Emerging Jet Flows from Multi-Hole Diesel Injectors at Different Needle Lifts 375
S. Moon, X. Zhang, J. Gao, K. Fezzaa, E. Durfresne, J. Wang, X. Xie, F. Wang, & M.-C. Lai

A Novel Spray Model Validation Methodology Using Liquid-Phase Extinction Measurements 397
G.M. Magnotti & C.L. Genzale

Uncertainty Quantification for Liquid Penetration of Evaporating Sprays at Diesel-Like Conditions 425
L.M. Pickett, C.L. Genzale, & J. Manin

Number 6

Spray in Automotive Applications: Part II vii
Q. Xue & S. Som

Effects of Noncondensable Gas on Cavitating Nozzles 453
M. Battistoni, D.J. Duke, A.B. Swantek, F.Z. Tilocco, C.F. Powell, & S. Som

One-Dimensional Diesel Spray Modeling of Multicomponent Fuels 485
J.V. Pastor, J.M. Garcia-Oliver, J.M. Pastor, & W. Vera-Tudela

Experimental Study of Conical Diesel Nozzle Orifice Geometry 519
T. Hulkkonen, T. Sarjoavaara, O. Kaario, I. Hämäläinen, & M. Larmi

Number 7

Evaporation of Water Spray from a Rotary Bell Atomizer Using a Phase Doppler Anemometer 539
R. Ray, P. Henshaw, N. Biswas, & C. Sak

Experimental Studies on Air-Assisted Atomization of Jatropha Pure Plant Oil 553
M.M. Avulapati & R.V. Ravikrishna

Simulation of the Calcium Chloride Aqueous Salt Solution Spray Regeneration Process 571
Y.A.F. El-Samadony, B.M. Gibbs, & W. Nimmo

Development of an Improved Spray/Wall Interaction Model for Diesel-Like Spray Impingement Simulations 587
P. Deng, Q. Jiao, R. Reitz, & Z. Han

Abrasive Water Jet Perforation Experiments under Ambient Pressures 617
Z. Huang, G. Li, H. Shi, J. Niu, X. Song, & S. Shao

Influence of Drop Spacing on Burning of an Emulsified-Drop String	629
<i>Y.-Y. Lin, C.-K. Chen, & T.-H. Lin</i>	

Number 8

Numerical and Experimental Study of Spray Coating Using Air-Assisted High-Pressure Atomizers	643
<i>Q. Ye, B. Shen, O. Tiedje, T. Bauernhansl, & J. Domnick</i>	
Effect of Atomizing Air Flow on Spray Atomization of an Internal-Mix Twin-Fluid Atomizer	657
<i>C.T. Chong & S. Hochgreb</i>	
Experimental Investigation of Spray Characteristics of Diesel-Methanol-Water Emulsion	675
<i>D. Wu, W. Wang, Z. Pang, S. Cao, & J. Yan</i>	
Effect of Elasticity of Boger Fluids on the Atomization Behavior of an Impinging Jet Injector	695
<i>M. Negri & H.K. Ciezki</i>	
A Numerical Study on a Light-Duty Diesel Engine Fueled with Blends of Gasoline and Diesel	715
<i>S. Xiao, W. Sun, L. Guo, M. Tan, L. Fan, & G. Li</i>	

Number 9

Evaporation Calculations for Polydisperse Water Sprays Using Spectral Scaling	737
<i>H. Zhao, L. Zhao, W. Jiang, & Y. Zhang</i>	
Image Processing Techniques for Velocity, Interface Complexity, and Droplet Production Measurement in the Near-Nozzle Region of a Diesel Spray	753
<i>K. Lounnaci, S. Idlahcen, D. Sedarsky, C. Rozé, J.B. Blaisot, & F.X. Demoulin</i>	
Experimental Study on Injection and Macroscopic Spray Characteristics of Ethyl Oleate, Jet Fuel, and Their Blend on a Diesel Engine Common Rail System	777
<i>Y. Duan, D. Han, P. Li, C. Wang, H. Lin, & Z. Huang</i>	
A One-Dimensional Two-Phase Flow Model and Experimental Validation for a Flashing Viscous Liquid in a Splash Plate Nozzle	795
<i>M.P. Järvinen, A.E.P. Kankkunen, R. Virtanen, P.H. Mikkulainen & V.P. Heikkilä</i>	
Effect of Injection Strategy on the Spray Development Process in a Single-Cylinder Optical GDI Engine	819
<i>J. Song & S. Park</i>	

Number 10

Flashing Behavior of Rocket Engine Propellants	837
<i>G. Lamanna, H. Kamoun, B. Weigand, C. Manfletti, A. Rees, J. Sender, M. Oswald, & J. Steelant</i>	
Theoretical Modeling of Spray Drop Deformation and Breakup in the Multimode Breakup Regime	857
<i>C. Wang, S. Chang, H. Wu, L. Ding, and J. M. Thompson</i>	

A Model for Predicting the Trajectory of a Liquid Jet in a Subsonic Gaseous Crossflow	871
<i>M. Broumand & M. Birouk</i>	
Effect of Assist-Air of Twin Fluid Atomizer on Urea Thermal Decomposition	895
<i>K.W. Ku, J.G. Hong, & C.W. Park</i>	
Comparison of the Flame Spreading Behavior of Oil-In-Water and Water-In-Oil Emulsions Along Linear Emulsion Droplet Arrays in a Microgravity Environment	917
<i>K. Yamada, H. Kataoka, T. Kagami, Y. Unno, D. Segawa, & T. Kadota</i>	

Number 11

Investigation of the Characteristics of Fuel Adhesion Formed by Spray/Wall Interaction under Diesel Premixed Charge Compression Ignition (PCCI) Relevant Conditions	933
<i>Y. Zhang, M. Jia, H. Liu, M. Xie, & T. Wang</i>	
Preliminary Investigation on the Spreading Angle of a Near-Critical RP-3 Kerosene Jet	969
<i>L. Jin, W. Fan, Z.-C. Fan, Z. Zhou, & J. Zhang</i>	
Electroconvection Peristaltic Flow of Viscous Dielectric Liquid Sheet in a Symmetrical Flexible Channel	985
<i>M.F. El-Sayed, M.H. Haroun, & D.R. Mostapha</i>	
Dynamics of Cleaning by Hydraulic Pulsed Jet	1013
<i>S. Liu, G. Li, H. Shi, Z. Huang, S. Tian, & R. Yang</i>	

Number 12

Influence of Emulsions and Steam Injection on a Diesel Fueled Model Gas Turbine Combustor	1025
<i>M. Sung & V.G. McDonell</i>	
Characterization of n-Butanol and Gasoline Spray from a Multihole Injector using Phase Doppler Anemometry	1047
<i>S.N. Igual, L. Marchitto, S.S. Merola, C. Tornatore, & G. Valentino</i>	
Numerical Models for Simulation of Cavitation in Diesel Injector Nozzles	1063
<i>B. Biçer & A. Sou</i>	
Influence of Reactor Pressure on Twin-Fluid Atomization: Basic Investigations on Burner Design for High-Pressure Entrained Flow Gasifier	1081
<i>T. Jakobs, N. Djordjevic, A. Sängers, N. Zarzaliss, & T. Kolb</i>	
Effect of Injection Parameters on Spray Characteristics of Gas-To-Liquid (GTL), Biodiesel, and Diesel Fuel for a Multi-Hole Injector in a Diesel Engine	1107
<i>K. Choi, D. Lee, H.G. Roh, & C.S. Lee</i>	

AUTHOR INDEX – Volume 25

Atomization and Sprays

PAGE RANGE OF ISSUES

Issue 1:1-98; Issue 2: 99-188; Issue 3: 189-284; Issue 4: 285-374;

Issue 5: 375-452; Issue 6: 453-538; Issue 7: 539-642; Issue 8: 643-736;

Issue 9: 737-836; Issue 10: 837-931; Issue 11: 933-1024; Issue 12: 1025-1125

- abrasive water jet, 617
air-assisted atomization, 553
air-assisted spray gun, 643
airblast, twin fluid, 657
ambient pressure, 617
annular injector, 1
arbitrary Lagrange-Euler (ALE) formalism, 189
assist-air, 895
atomizer constant, 153
axial tension, 99
backlight imaging, 519
biodiesel, 1107
biofuel atomization, 553
black liquor, 795
Boger fluid, 695
breakup, 47, 857
breakup length, 153
bubble growth modeling, 795
casing, 617
cavitation, 317, 453
chemical vapor deposition, 23
cleaning, 1013
coherent structures (CS), 285
column trajectory, 871
combustion, 715, 1025, 1107
common rail, 777
compressible liquid, 47
computational fluid dynamics (CFD), 285, 571, 715
conversion efficiency, 895
correlation, 871
cross-flow, 81
cryogenic fuels, 837
cuttings, 1013
deformation, 857
Diesel engine, 715, 777
diesel spray, 397, 425, 519, 587
diffuse interface method, 47
direct injection, 255
direct-injection engines, 587
direct injection spark ignition (DISI)1047
discharge coefficient, 153
discrete droplet modeling (DDM), 335
drop, 857
drop interaction, 629
drop spacing, 629
droplet array, 917
droplet combustion, 917
droplet deposition, 643
droplet size, 643
droplet size distribution, 675
early injection, 933
electrohydrodynamics, 985
emulsified fuel, 917
emulsion, 675, 1025
emulsion drop, 629
ethylolate, 777
Eulerian-Eulerian model, 47
Eulerian models, 189
evaporation, 425
evaporation flux, 737
evaporation model, 485
evaporating spray, 189, 539
experiments, 617
extinction, 425
flame spread, 917
flash boiling, 23
flashing, 795
flashing regime, 837
flexible channel, 985
fuel injector, 1063
fuel spray, 81, 519
fuel stratification, 255
fugacity coefficient, 485
fundamental spray characteristics, 519
gas-centered liquid, 1
gaseous crossflow, 871
gasification, 1081
gas liquid interface, 123
gasoline and Diesel blends, 715
gasoline direct injection, 819
gasoline engine, 81
gas-to-liquid (GTL), 1107
gas turbine, 1025
gelled propellant, 695
heat transfer, 985
high order moment methods, 189
high pressure, 871, 1081
high-pressure injection, 753
high temperature, 871
hydrodynamic stability, 123
imaging technique, 753
impinging jet injector, 695
injection, 777, 969
injection angle, 871
injection rate, 1107
injector nozzle flow, 453
injector nozzle position, 335
internal flow, 1063
Jatropha pure plant oil, 553
jet fuel, 777
jet spreading angle, 969
K-factor, 519
KHRT breakup model, 335
large eddy simulation (LES), 285
laser Doppler anemometry (LDA), 1047
light extinction, 397
light scatter, 425
limestone, 617
linear instability analysis, 99
liquid desiccant, 571
liquid film, 933

liquid fuel jet, 375
 liquid jet, 871
 liquid length, 397, 425, 485
 liquid sheet, 99, 123
 liquid sheet breakup, 695
 liquid sheet instability, 1
 liquid-vapor equilibrium, 485
 local structure, 397
 microexplosion, 629, 917
 microgravity, 917
 Mie scattering, 397
 mixture distribution, 255
 mixture model, 453
 model validation, 397
 momentum ratio, 1
 multi-hole nozzle, 375
 multimode 857
 multi-orifice injector, 375
 n-butanol, 1047
 near-critical, 969
 needle lift, 375
 noncondensable gas, 453
 nonreacting spray, 657
 nozzle cavitation, 1063
 nozzle geometry, 519
 numerical modeling, 795
 numerical solution, 123, 1013, 1063
 oil-in-water, 917
 OpenFOAM, 1063
 optical engine, 819
 paint spray, 539
 particle/droplet imaging analysis (PDIA), 553
 particle image velocimetry (PIV), 81, 1047
 penetration, 81
 Peng-Robinson EoS, 485
 peristaltic flow, 985
 phase doppler anemometer (PDA), 539, 657, 1047, 1081
 polydispersity, 189
 precursor, 23
 premixed charge compression ignition (PCCI), 933
 primary breakup, 1081
 pulsed jet, 1013
 pumping phenomena, 985
 radiation attenuation, 737
 radiation characteristics, 737
 recess ratio, 1
 regeneration, 571
 RP-3 kerosene, 969
 Sauter mean diameter (SMD), 153, 895, 1081
 selective catalytic reduction (SCR), 895
 shadowgraphy, 1081
 simple injector, 969
 single-hole injector, 753
 soybean methyl ester, 1107
 spherical volume interaction (SVI), 335
 splashed mass ratio model, 933
 spray characteristics, 553, 675, 753, 1107
 spray coating, 643
 spray cone angle, 153, 675
 spray development, 819
 spray-grid dependency, 335
 spray tip penetration, 675
 spray turbulence, 285
 spray/wall interaction, 933
 spray/wall interaction model, 587
 steam injection, 1025
 stiffened gas EOS, 47
 stiffened gas equation, 317
 storable fuels, 837
 stratified charge compression ignition (SCCI), 255
 superheated sprays, 837
 swirl atomizer, 153
 thermal decomposition, 895
 trapping phenomena, 985
 turbulence, 47, 317
 twin fluid atomizer, 895, 1081
 two-fluid model, 47, 317
 two-phase flows, 795
 two-surface density, 47
 two-way coupling, 189
 viscoelastic fluids, 99, 123
 viscoelasticity, 695
 viscous liquid sheet, 985
 water-in-oil, 917
 water injection, 1025
 water sprays, 737
 X-ray phase-contrast imaging, 375
