Professor Rama Rao Malla is the Head of the Cancer Biology Laboratory and also a faculty member of the Department of Biochemistry and Bioinformatics, GITAM School of Science, GITAM (Deemed to be University), Visakhapatnam, Andhra Pradesh, India. Dr. Malla obtained his master’s of science and doctorate in biochemistry from Andhra University, Visakhapatnam, Andhra Pradesh, India, and did postdoctoral research at the University of Illinois, College of Medicine, in the United States. His research focus is to explore tetraspanin CD151 as a therapeutic target and its microRNA candidates or exosomal CD151 as early diagnostic markers for triple-negative breast cancer. Dr. Malla also focuses on exploring the role of CD151 in the tumor microenvironment and drug resistance mechanisms. He has published more than 150 research articles in peer-reviewed international journals and presented more than 100 abstracts at national and international conferences. Dr. Malla is the author or co-author of over 35 book chapters published by international publishers and edited a book on female-specific cancer. He is an editorial board advisor and member of various international journals and has received one research award and one academic excellence award.
