MAURIZIO CÈ, MD, GUEST EDITOR

Maurizio Cè is currently a fourth-year medical resident in radiodiagnostics at the University of Milan, Italy. After graduating with degrees in medicine and philosophy at the University, he joined the research group of the Fatebenefratelli Hospital in Milan under the guidance of Dr. Michaela Cellina, combining his interest in new technologies with methodological issues underlying biomedical research.

In clinical practice, Dr. Cè’s main area of interest is cross-sectional imaging of hepatobiliary pathology, with particular emphasis on modern ultrasound techniques for the study of metabolic liver diseases. Recently, he has focused on artificial intelligence applied to biomedical imaging, exploring its main applications in clinical practice and analyzing the challenges and opportunities it represents for the world of radiology.

Dr. Cè has also authored 27 publications indexed in Scopus.
