## ISSUE 1

Effect of Slip Condition on MHD Flow and Heat Transfer through a Permeable Nonlinearly Stretching Sheet in a Porous Medium Using the Homotopy Analysis Method  
R. Agrawal & P. Kaswan  

Experimental and Numerical Thermal Performance Evaluation of Helical Screw Inserts in a Tube with Double Strips at Laminar Flow  
S.R. Chaurasia & R.M. Sarviya  

General Mass Transfer Modeling for Multiphase Flows: VOF Method with PLIC-1 and PLIC-2 Schemes  
C. Roy, A. Bénard, & J.F. Klausner  

Computational Investigation on the Effect of Geometrical Parameters on Thermal Energy Storage Systems  
S. Chavan, V. Gumtapure, & D.A. Perumal  

Mathematical Modeling and Numerical Analyses of Transport Phenomena with Variable Cross-Diffusion and Nonlinear Radiation  
C. Nwaigwe

## ISSUE 2

Numerical Analysis of Transport Phenomena under Turbulent Annular Impinging Jet  
P. Dutta & H. Chattopadhyay  

Effects of Variable Thermal Conductivity of Water-Based Nanofluids Saturated with Porous Medium on Natural Convection Heat Transfer Enhancement  
J.C. Umavathi, A. Al-Mudhaf, & A.J. Chamkha  

Numerical Simulation of Pulsed Jets of a High-Current Pulsed Surface Discharge  
V.V. Kuzenov & S.V. Ryzhkov  

Numerical Study of Variation in Drag and Virtual Mass Forces for a Nanofluid Flow through a Microchannel Using Eulerian-Eulerian Two-Phase Model  
M.S. Abhijith & K. Venkatasubbaiah  

Numerical Study of Turbulent Flow in Asymmetrically Heated Vertical Annulus  
B. Shome  

Forced Convection Heat Transfer from a Heated Rotating Sphere in a Non-Newtonian, Power-Law Fluid  
A. Pantokratoras

## ISSUE 3

Convective Flow of a Bingham Fluid in Internally Heated Porous Cavities  
D.A.S. Rees  

Volumetric Radiative Heat Transfer in Participating Media Near Solids for Large Temperature Gradient  
S. Hamimid, M. Guellal, & M. Bouafia  

Thermal Interaction of Natural Convective Heat Transfer from Two Vertically and Horizontally Separated Isothermal Elements  

A. Kalendar, Y. Alhendal, S. Hussain, & P. Oosthuizen

Numerical Study of Effect of Pitch-To-Rod Diameter Ration on Heat Transfer to Supercritical Water in 2 x 2 Rod Bundle
S. Sahu & A.M. Vaidya

Analysis of UltraShort Laser Pulses on Thin Metal Films Using The Hyperbolic Dual Phase Lag Model
K. Badawy, M. Hisham, & S. Junaidi

Numerical Analysis of Non-Fourier Phase-Change Heat Transfer in Biological Tissue with the Addition of Nanoparticles
S. Sukumar & S.P. Kar

**ISSUE 4**

Transient Thermal Flow in a U-Bend and Its Influence on Wall Thermal Stress
W. Liu, A. Skillen, M.J. Zimoń, R. Sawko, C. Moulinec, & D.R. Emerson

Influence of Thermal Radiation on Entropy Analysis of Generalized MHD Unsteady Viscous Fluid Flow on a Stretching Sheet with Joule Heating and Viscous Dissipation
R. Agrawal & P. Kaswan

Computational Fluid Dynamic Analysis of Flow Parameters in Water Distribution Pipeline in Presence of Rectangular and Circular Leakages
H.Z. Abiz & M. Farajollahi

Numerical Simulation of Time-Fractional Bioheat Transfer Model during Cryosurgical Treatment of Skin Cancer
M. Kumar & K.N. Rai

Effect of Phase Change Material Insertion on Thermal Energy Stored Inside a Partition Wall Separating a Conditioned Room and a Room of Periodic Temperature
N. Hanchi, H. Hamza, K. Zniber, J. Lahjomri, & A. Oubarra

**ISSUE 5**

Numerical Study of MHD Heat Convection of Nanofluid in an Open Enclosure with Internal Heated Objects and Sinusoidal Heated Bottom
E.G. Ushachew, M.K. Sharma, & O.D. Makinde

A Comparative Study of MHD Non-Newtonian Fluid Flows with the Effects of Chemical Reaction and Radiation Over a Stretching Sheet
M.V. Reddy, P. Lakshminarayana, & K. Vajravelu

Aqueous Titanium Alloy-MWCNTs Hybrid Nanofluid Flow in a Non-Darcy Porous Medium
Ch. RamReddy & A. Srivastav

A Convective MHD Double Diffusive Flow of a Binary Mixture through an Isothermal and Porous Moving Plate with Activation Energy
A.M. Okedoye, S.O. Salawu, & R.E. Asibor

Nonlinear Thermal Radiation Effect on Magnetohydrodynamic Williamson Nanofluid Past a Wedge/Flat Plate/Stagnation Point of the Plate with Activation Energy
G. Kumaran & R. Sivaraj

MHD Natural Convection of Hybrid Nanofluid in a Porous Cavity Heated with a Sinusoidal Temperature Distribution
L. Jino & A.V. Kumar

**ISSUE 6**

The Effect of Changeable Gravity Field on the Stability of Convection in a Porous Layer Filled with Nanofluid: Brinkman Model
D. Srinivasacharya & D. Barman

Conduction Heat Transfer through Solid in Porous Materials: A Comparative Study by Finite-Element Simulations and Effective Medium Approximations

Entropy Generation in Magneto-Nanofluid Flow between Two Coaxial Cylinders by Using a New I-ADM Technique

N. Benazizza, M.K. Nacereddine, M. Kezzar, M.R. Sari, K. Khounfais, & M.R. Eid

Optimization of the Geometrical Parameter and Flow Friction Evolution for Turbulent Regime of the Plain Bearing

M. Rebiai, K. Mehala, N. Bendaoud, & A. Youcef

Heat Balance Integral Method for a Time-Fractional Stefan Problem with Robin Boundary Condition and Temperature-Dependent Thermal Conductivity

A. Kumar & Rajeev

Nonlinear Thermal Radiation and Activation Energy Effects on Bioconvective Flow of Eyring-Powell Fluid

A. Sumithra, R. Sivaraj, A.J. Benazir, & O.D. Makinde
