INDEX

Avogadro number, 60

Capillary flow technique, 4, 5, 40–42
Coaxial cylinders technique, 5, 28, 39–40
Critical region, 2, 16, 39–42, 53
  point, 2-4, 114
  parameters, 2, 171
  temperature, 2, 171
  pressure, 2, 171
  density, 2, 171
  isochore, 4, 51, 62, 65, 67, 99
  exponents, 73, 80, 81, 85–89
  amplitudes, 85, 106, 107, 136, 137
Crossover function, 67, 73, 126
  model, 126
  theory, 66

Diffusion coefficient, 55, 62, 67, 114
Dynamic renormalization-group theory, 75, 80

Einstein’s relation, 97
Equation of state, 100, 113, 120, 148, 149
Experimental techniques, 5

Falling body technique, 16, 40–42
Fourier equation, 25
  law, 31

Heat capacity, 56, 57, 63, 66
Heaviside function, 68

Hot wire technique, 23, 30, 39–40

Isothermal compressibility, 60, 61, 99, 115, 120

Kawasaki’s function, 36, 70
  model, 53, 54
  theory, 36

Lorenz-Lorenz function, 37

Method of photon-correlation spectroscopy, 34, 39–40
Mode-coupling theory, 63, 75, 80
Mie-Lambert’s model, 53

Onsager coefficient, 62
Ornstein-Zernike approximation, 60, 78, 99
  equation, 52, 69
  theory, 61
Oscillating body technique, 17, 40–42
Oscillating discs technique, 4, 5, 40–42

Parallel-plate technique, 23, 39–40
Phase-equilibrium curve, 103, 106, 107, 136
Poiseuille’s law, 5
Pseudospinodal, 100, 103, 105, 108, 144
  scaling, 100, 104, 130

Rayleigh linewth, 23
  number, 29
Rotating cylinders technique, 5, 17, 40–42

207
Scaling functions, 95, 110, 136
Spinodal, 106-107
Stefan-Boltzmann law, 29
Stokes-Einstein relation, 63, 114
Stokes' formula, 10
law, 16, 64

Temperature absolute critical, 3
reduced, 3
relative, 3
Thermal conductivity, 1, 2, 4, 5, 38, 57, 140, 171–206
Thermal diffusion coefficient, 34, 36, 38
Thermal diffusivity, 61
coefficient, 23, 33
Torsional crystal oscillator technique, 5, 14, 40–42
Transport properties, 1, 2, 43, 57, 63, 113
Van-der-Waals gas, 53, 56, 57
Van-Kampen’s model, 53, 55
Vibrating wire technique, 4, 5, 10, 40–42
Viscosity, 2, 4, 5, 38, 57, 140, 171–197
Yukawa's potential, 56
