Index

ABB Lummus Global, 8, 13, 25
Achinsk refinery, 9, 94, 106
Acidity and acid number, 55
  of automotive gasolines, 65
  of cerosines, 70
  of lube oils, 74, 75, 77
Additives
  for gasolines (see Antiknock additives)
  for lubricating oils and greases (see Lubricant additives)
Afipsk refinery, 8, 14
Air coolers, 145, 151–154
designation, 152
electric motors for, 154
horizontal, 145, 153, 154
  for high viscous media, 154
  for viscous media, 154
  low flow, 151
vertical, 145, 151, 153
  low flow, 151
zigzag, 153
Aircraft engine lube oils, basic requirements, 77
Air dryers, 174, 178
Air preheaters, 137
Air supply, 126
"Alifar" process, 85
Alkylation, 8, 15, 20, 86, 92
Alty-Arik refinery (see Uzneftepererabotka)
Amoco company, 26, 105
Analyses of products, 55–57
  gas, 57, 58
  gasoline, 55, 56
  jet fuel, 55, 56
lube oil, 56, 57
oil, 55
Angarskneftekhim project, 91
Angarsk petrochemical company, 6, 91, 108
Aniline point of solvents, 73
Antiknock additives, 56, 64
  content of
    in automotive gasoline, 64
    in aviation gasoline, 64
    test method, 56
Aromatic hydrocarbons, 13, 43, 44, 66, 71, 72, 85
"Aquadel" process, 85
Ash content, 55, 57
  in cerosines, 70
  in heavy fuel oil, 67
  in lube oils, 74, 75
  in petroleum coke, 70
  test methods, 55, 57
Asphalts, 57, 66–69, 86, 93
  properties, 68, 69
  test methods, 57
Atmospheric distillation, 86, 91, 92, 97, 98
Atyrau refinery, 44, 45, 91, 94
Automotive gasoline, 64, 65
Aviation gasoline, 64, 65
Aviation turbine fuels (Jet fuels), 65, 66
Axle oils, 75
Azerneftyanag refinery, 48, 49
Azerneftyanadzagh refinery, 48, 49
Azgiproneftekhim, 91, 104, 108
Babcock company, 44, 107
Badger company, 11, 45
Baku refinery (see Azerneftyag)
Barrels, 180, 184
Bashpriborneftekhim, 92, 107
BashNIINP (see Institute for Petroleum Refining Processes)
Batumi refinery, 52, 93, 110
Bechtel company, 106
Belenergomash, 137
Benzene, 13, 44, 65
  basic requirements, 71
  units for production, 66
Blowers, 177
Boilers, waste-heat, 137, 138
Boiling range (see Distillation temperature)
Brittleness point, 68, 69
Bromine number, 55, 73
Bukhara refinery, 49
Burners, 136, 137

Cans, 180, 184
Carbon residue, 62
Catalysts, 84–89
  for catalytic cracking, 86, 104, 105
  for catalytic reforming, 85, 99–101
  for hydrotreating, 84, 87, 89, 102
  for isomerization, 85
Catalytic cracking, 7–9, 15, 16, 25, 31, 34, 39, 40, 46, 84, 104–106
catalysts, 86, 104, 105
domestic technologies, 40, 46
energy consumption, 106
flowsheets, 104, 105
process characteristics, 105
  units
    1A/IM, 26, 36, 91, 104, 105
    FCC, 11, 21, 31, 39, 48, 85, 87, 104
    43–103, 105
    G-43/107, 46, 48, 104
    Houdry, 23, 104
    Thermafoor (43–102), 11, 29, 85, 104
Catalytic reforming, 14, 31, 42, 85, 93, 99–101
catalysts, 85, 99–101
domestic technology (CCR), 12, 19, 21, 23, 33, 35, 36, 48, 51
domestic technology, 31, 85
Dualforming, 20, 43, 101
energy consumption, 100
engineering, 93, 99
feed for, in FSU crudes, 60, 61
for aromatics, 99, 101
for octane number upgrade, 99
  number of units, 99
typical units, 101
Ceresine, 66, 69
Cetane number, 56, 61, 67
Charjew refinery, 51, 52, 91
Chepos company, 100, 103
Chevron company, 13
Chimkent refinery, 44–46, 91, 106
Chlorides in oil, 63
Cloud point, 56, 67, 72
  of diesel fuels, 67
  of kerosene, 72
Coke (see Petroleum coke)
Color, 55–57, 69, 70–72, 74
  of benzene and toluene, 71
  of cerosines, 70
  of kerosene, 72
  of lube oils, 74
  of waxes, 69
  of xylenes, 72
Combined (integrated) units, 47, 53, 92, 104, 108, 109
  GK-3, 92, 104, 108
  KM-2, KM-3, 92, 109
  KT-1, 47, 53, 92, 104–106, 109
  LK-6U, 39, 42, 47, 53, 93, 109
Compressor oils, 73, 75
Compressors, 174, 175–177
  for air, 176
  for combustible gases, 175, 176
  for nitrogen, 176, 177
  indications on applying, 175
Condensers, 145, 149
Conversion processes, 99
Coolers, 145, 149
Copper number, 56
Corrosiveness, 56
Cracking thermal (see Thermal cracking)
Crude oil (see Oil)
Crude distillation, 29, 34, 86, 91–94, 97–99
  capacity of units, 97
  energy consumption, 98
  history, 97
  list of typical units, 98
  number of units, 97
Crystallizers, 159, 160
CTIP company, 38, 103
Cutback asphalt, 68
Deemulsibility, 56
Deemulsifiers, 97
Dehydrators, 97
Delayed coking, 8, 9, 19, 25, 46–48, 92, 106
Density, 55
  of diesel fuels, 67
  of jet fuels, 65
  of kerosene, 72
  of solvents, 73
  relative, 58
test methods, 55, 57
Departmental Standards (see OST)
Desalting, 96, 97
parameters, 97
units, 96, 97
Desalters electric, 139
Dewaxing of diesel fuels, 29, 43, 85, 87, 91, 92
adsorption, 29, 43, 85, 92
by urea, 29, 85, 87, 91, 92
Dew point, 58
Diesel engine lube oils, 76, 78
Diesel fuels, 66, 67
Distillation temperature, 55, 57, 64, 67, 72, 73
of automotive gasoline, 64
of aviation gasoline, 64
of diesel fuel, 67
of jet fuels, 65
of kerosene, 72
of solvents, 73
test methods, 55, 57
Double-pipe exchangers, 145
Drogobich refinery (see Galichins refinery)
Drop point, 55, 57, 69
"Druzhba" ("Friendship") pipeline, 39, 40, 43, 44, 53
Ductility, 57, 68, 69
Dynamic viscosity, 55
Eastern (Vostochnaya) Oil Company, 6, 9
Ejectors, 158, 159
Electrical equipment (see Power electrical equipment)
Electric desalting units – ELOU
(see Desalting units)
Electricity supply (see Power)
Electric lines, 118
ELINP (Electrogorsk NIINP institute), 87, 102
End packings, 169–171
Engineering companies (see Institutes, design)
Engine oils, 75–78
classification, 75, 76
specifications, 77, 78
Environmental contaminations, norms, 203–207
air, 203–205
water, 206, 207
Environmental protection, 203–206
ETU (Export technical conditions), 63
Evaluation of stocks (see Analysis of products)
Evaporators, 145, 150
Exchangers (see Heat exchangers)
Explosive and fire-dangerous areas, 119, 197, 198
Explosive mixtures, 120
Extraction columns, 145

Synthetic fatty alcohols, 31
Synthetic fatty acids, 31, 40
Syzran refinery, 29, 30, 38, 94
Tank-cars, 111
Tanks, 114, 180–184
for chemical products with high density, 183
for corrosive noncombustible chemical
products, 183, 184
for LPG, 182
for oil and refinery products, 182, 183
horizontal cylindrical, 183
selection, 114
vertical, 182
with cone roof and pontoon, 182
with floating roof, 182, 183
Tatneft, 6, 39
Technip, 20, 23, 31, 49, 51, 106
Test methods, 54–58
Tetraethyllead, 64
Texaco, 25, 107
Thermal conductivity, 152
Thermal cracking, 19, 91, 92, 106
Thermal operations, 106
number of units, 106
typical units, 107
Thermal oxidation stability, 56, 57
Thermosyphon heat exchangers, 145
Toluene, 13, 43, 44, 66, 71
Towers (see Tray columns, Packing columns)
Turbine oils, 73, 74
Transformer stations, 117
Trays, 140–145
Flexytray, 143
Grid, 142
S-shaped (Uniflex), 143
types, 140–145
valve, straight-through (Flexitray), 143
valve ballast, 144
Tray columns, 139, 140, 143–145
engineering design, 140, 143
for various process units, 144, 145
Tsniproektstalnkonstruktsiya, 180
TU, Technical condition, 54, 55, 63
Tuapse refinery, 30, 31, 93
Tubestill furnaces, 132–136
characteristics, 134–136
designation, 133, 136
typical, 133
Turbine oils, 73
Turkmenbashi refinery, 51, 91, 92, 110
Typical design, 96, 98, 101, 103, 107, 108
Tyumen oil company, 6, 25
Ufanetfekhim, 19, 31, 32, 92, 101, 106
Ufa refinery, former Lenin, 19, 31–33, 92
Ukhta refinery, 33, 34
Ukrneftekhimproject, 94, 108
Ukrtransnafta (see Kremenchug refinery)
UOP, 12, 21, 29, 33, 36, 44, 48, 51, 93, 101, 106
Utilizing of secondary energy resources, 137, 138
Vacuum distillation, 9, 25, 44, 86, 91, 98
Vacuum-producing systems, 158
Vapor pressure, 55
of automotive gasoline, 64
of aviation gasoline, 64
of LPG, 70
of oil, 63
test method, 55
Vertical integrated oil companies, 6
Vessels, 174, 179–184
cylindrical, 179
designation, 180
for LPG (see Tanks for LPG)
horizontal, 180, 181
operating under pressure, 200, 201
pressure excess in designing, 200, 201
safety valves, 201
testing pressure, 201
vertical, 181
